Consilience, Truth and the Mind of God Richard J. Di Rocco, 2018-12-17 This book argues that God can be found within the edifice of the scientific understanding of physics cosmology biology and philosophy It is a rewarding read that asks the Big Questions which humans have pondered since the dawn of the modern human mind including Why and how does the universe exist From where do the laws of physics come How did life and mind arise from inanimate matter on Earth Science and religion have a common interest in the answers to such questions yet many scientists and believers have been at odds for centuries The author and contributors present a program for moving beyond the vastly different perspectives of reality offered by science and religion Historical proofs for the existence of God are considered in light of the possibility that the universe may be only one in an eternal multiverse that contains an infinite number of other universes Readers will find a modification of St Augustine's Argument from Truth for the existence of the necessary self sufficient being commonly referred to as God This book is suited to all with an interest in the crossing points of science and religion providing much food for thought and reflection If in the end you cannot accede to philosophy's proofs or theism's invitation to faith perhaps you will nevertheless say yes to the amazing universe in which we live
