Ray

of Hope: Asha Deep's Journey Towards Inclusion Deep Kumar, Madhu Singh, 2024-06-08 All students have access to social and general education resources and schools strive to place students including those with special needs in the least restrictive classrooms However many instructors lack the training to effectively teach special needs students despite their presence in mainstream schools and a desire to support them A study conducted at the Asha Deep Rehabilitation Centre for Divyangjan in Patna explored special education facilities It examined the center's history vision mission goals curriculum co-curricular activities life skills training vocational training outcomes and the admission and retention of children Additionally the book includes information on the Rights of Persons with Disabilities Act of 2016 the RPWD Rules of 2017 and the Amendment Rules of 2019 2020 and 2023 highlighting India's legal rights for the disabled

MMS Daniel Ralph, Paul Graham, 2004-04-21 MMS has evolved from the huge popularity of the SMS text service for GSM networks It is a departure from the transport mechanism used for SMS which is based on the GSM signalling channels to the use of IP to transport messages within the MMS network To this end MMS has similarities with Internet email and standard IETF protocols As with any new technology it is difficult to accurately predict the position within the next 5 years although based on previous experience with WAP and SMS it would be fair to say that these protocols will increase in usage over the next 5 years and become legacy for a further 5 years following which users will migrate onto the next wave of messaging Significant revenue growth and data usage is expected to be driven by consumer usage of MMS But MMS technology offers more than just a broadening of message content With MMS it is not only possible to send your multimedia messages from one phone to another but also from phone to email and vice versa This feature dramatically increases the possibilities of mobile communication both for private and corporate use Multimedia messaging will reshape the landscape of mobile communication making it more personal more versatile and more expressive than ever before MMS Is the first book to address how MMS and the use of IP to transport messages will affect existing infrastructure and business models Covers the fundamental changes to mail and billing systems Includes future recommendations such as interoperability and evolution Presents an overview of the MMS technology components Drawing on the authors hands on experience in the implementation of MMS technology developing billing and delivering services at BT this innovative book will appeal to engineering managers network operators market analysts business decision makers content providers and operator organizations
