Learning Environment and Design Will W.K. Ma, Kar-wai Tong, Wing Bo Anna Tso, 2020-11-07 This special edition of the Educational Communications and Technology Yearbook Series bears a title of Learning Environment and Design Current and Future Impact It provides a timely forum to share theoretical and practical insights in both the local and international contexts in response to the fact that new media and technologies have infiltrated and shaped the learning environments from mere physical spaces into

multifaceted possibilities impacting the ways individuals teach and learn. Designs of learning environments to harness technologies appropriately to engage learners better, as well as the roles of learners and educators play in this changing learning environment, are examples of important global issues in the discourse of the contemporary educational developments. Having gathered a diverse collection of research papers written by scholars and practitioners in the fields of education, communication, and humanities across Asia, Australasia, Europe, and the United States, this book gives readers a cross-cultural background on the developments of technological designs and educational practices investigating areas in redefining of quality education, online learning, and blended learning, new media in education, gamification, AI, and innovative learning technologies. Aimed to catalyze knowledge exchanges and provide fresh views on interdisciplinary research, the book sheds light on how emerging technologies can be adapted in the fields of education and communication so as to facilitate the current and future designs of learning environments to improve learners' performances. **Drug Development for Gene**

**Therapy** Yanmei Lu, Boris Gorovits, 2024-02-28. *Drug Development for Gene Therapy* Industry-centric perspective on translational and bioanalytical challenges and best practices for gene therapies. *Drug Development for Gene Therapy* focuses on the translational and bioanalytical challenges and best practices for gene therapy modalities, presenting a significant body of data including information related to safety and efficacy necessary to advance through the development pipeline into clinical use. The text covers bioanalytical methods and platforms including patient screening assays, different PCR tests, enzyme activity assays, ELISpot, NGS, LC-MS, and immunoassays with FDA and EMA guidelines on gene therapy safety and efficacy along with companion diagnostics regulations from US and EU perspectives. The chapters offer an in-depth discussion of the basics and best practices for translational biomarkers, bioanalysis, and developing companion diagnostics, lab tests for gene therapies in the pharma and biopharma industries. To aid in reader comprehension, the text includes clinical examples of relevant therapies in related chapters. Some of the core topics covered include study design, immunogenicity, various bioanalytical methods and their applications, and global regulatory issues. Written by two highly qualified authors with significant experience in the field, *Drug Development for Gene Therapy* includes information on Bioanalytical methods to detect pre-existing antibodies against adeno-associated viruses, AAV capsids, Detection of cellular immunity and humoral response to viral capsids and transgene proteins, and immunogenicity of gene therapy products. Nonclinical and clinical study considerations and methods for biodistribution and shedding, Quantification of transgene protein expression and biochemical function and substrate, and distal pharmacodynamic biomarker measurements for gene therapy. Detection and quantification of rAAV integration and off-target editing. Current regulatory landscape for gene therapy product development and the role of biomarkers and general regulatory considerations for gene therapy companion diagnostics. With comprehensive coverage of the subject, *Drug Development for Gene Therapy* is a must-have resource for researchers and developers in the areas of pharmaceuticals, biopharmaceuticals, and contract research organizations (CROs) along with professors, researchers, and
