

Plato's place, in western political thought, would always remain unparalleled. Numerous idealists regard Plato as their teacher and they feel great in calling themselves his disciples. Some admire Plato while others condemn him, but none dare ignore him. It is here where Plato's greatness lies. He was, indeed, the idealist among the idealists, the artist among the artists, the philosopher among the philosophers, and the revolutionary among the revolutionaries.

2.2 INTRODUCING PLATO

2.2.1 The Man and His Times

Plato an aristocrat by both birth and temperament was born in democratic Athens, at a time when it was engaged in a deadly war against Sparta—The Peloponnesian War. The war lasted for about 28 years, and resulted in the fall of Athens. On his father's side, Plato traced his descent from Codrus, the last of the tribal kings of Athens, or even from the God Poseidon, and on the mother's side, from that of Solon, the great law-giver.

Plato was a child, when his father, Ariston, died, and his mother Perictione married Pyrilampes, an associate of Pericles, the statesman. As a young man, Plato had political ambitions, but he became a disciple of Socrates, accepting his basic philosophy and dialectical style of debate: the pursuit of truth through discussions and dialogues. In fact, Plato was disillusioned the way things were going around. He was invited to join public life when the Spartan puppet government, the Rule of Thirty, was established in 404 BC and where his maternal uncles, Critias and Charmides, were members of that group. Plato declined the offer, because he was disappointed by the functioning of political leadership, in general, and by his disgusting experiences of the two successive governments in particular, first by the Rule of Thirty, and later by the returned democratic faction, the former entrapping Socrates on charges of corrupting the youth, and the latter executing him on charges of impiety. All this convinced Plato that all politics are evil if not given proper management and direction. Plato himself writes in the *Seventh Letter*, supposed to be his autobiography, saying: "... eager though I had been at first to go into politics, as I looked at these things (the course of political life in the city-states) and saw everything taking any course at all with *no direction or management*, I ended by feeling dizzy. ... But at last I saw that as far as all states now existing are concerned, *they are all badly governed*. For the condition of their laws is bad almost past cure, except for some miraculous accident. *So*, I was compelled to say, in praising true philosophy, that it was from it alone that one was *able* to discern all true justice, private as public. And so I said that *all the nations of men will never cease from private trouble until either the true and genuine breed of philosophers shall come to political office or until that of the rulers in the states shall by some divine ordinance take to the true pursuit of philosophy*". (Italic added)

After Socrates' execution in 399 BC, Plato, fearing for his own safety, and in all disillusionment, set himself for long travels temporarily abroad to Italy, Sicily and Egypt. In 388 BC, Plato, after his return to Athens, founded the *Academy*, the institution often described as the first European University. It provided a comprehensive curriculum, including such subjects as astronomy, biology, political theory, philosophy and mathematics, inscribing, on the very gate of the *Academy*, about mathematics: "Those having no knowledge of mathematics need not enter here."

- * Pursuing an opportunity to combine philosophy and practical politics, Plato went to Sicily in 367 to tutor the new ruler of Syracuse, Dionysius, the younger, in the art of philosophical rule. The experiment failed. Plato made another attempt to Syracuse again, in 361 BC, but once

Plato's Sun Andrew Lawless,2005-12-15 Writing an introductory text for philosophy is an exceedingly difficult task The discipline has spent a century or more in existential crisis with the attack on metaphysics dating back at least to Nietzsche and carried forward in different ways by Heidegger Wittgenstein and Derrida to name a few This constant upheaval has precipitated a climate of self doubt that goes to the core of philosophy the result being a strange discipline with many of its most illustrious names proudly announcing its demise In Plato's Sun Andrew Lawless takes on the challenge of creating an introductory text for philosophy arguing that such a work has to take into account of the strangeness of the field and divulge it rather than suppress it beneath traditional certainties and authoritative pronouncements Lawless writes within the shadow of post modern anti metaphysical skepticism introducing some of the principal areas of philosophy metaphysics epistemology logic ethics and language Lawless's concern is not to resolve the issues he raises so much as to set them out in a way that lets the reader experience something of the philosopher's struggle In so doing Lawless holds fast to the Socratic vision of philosophy as a process of inquiry that values questions above answers pushing the inquirer beyond his or her answers With numerous pedagogical features including glossaries of names and key terms suggested readings and short chapter

summaries Plato's Sun will be an essential text to new students of philosophy and an important aid in teaching the subject
