*Adoption of LMS in Higher Educational Institutions of the Middle East* Rashid A. Khan, Hassan Qudrat-Ullah, 2020-07-28  
This book discusses the adoption of learning management systems LMS in higher education institutions. It presents influential predictors that may impact instructors' behavioral intention to adopt learning management systems in the context of Arab culture as well as a unique model of technology acceptance that draws on and combines previous technology adoption models, i.e., a modified unified theory of acceptance and use of technology model (UTAUT2). Moreover, this study extends the UTAUT2 model by including Hofstede's 1980 cultural dimensions and technology awareness as the moderators of the model. It also describes the explanatory technique approach used to collect quantitative data from the instructors at higher education institutions in Saudi Arabia and were analyzed with structural equation modeling using SPSS Amos software. The findings revealed that facilitating conditions were the strongest predictor of behavioral intention to adopt an LMS, followed by performance expectancy and hedonic motivation. Technology awareness and cultural dimensions exerted a moderating influence on instructors' behavioral intention to use LMS in their teaching. By including new constructs, this becomes the first study of its kind exploring instructors' use of LMS in Higher Educational Institutions of Saudi Arabia and other countries of the Middle East. It offers practical insights for a broad range of researchers and professionals at higher education institutions and serves as a reference guide for designers of learning management systems, e.g., Blackboard systems, policymakers, and the Ministry of Education staff.

**Common Sense** Thomas Paine, 2021-03-22  
A long habit of not thinking a thing wrong gives it a superficial appearance of being right and raises at first a formidable outcry in defense of custom. But the tumult soon subsides. Time makes more converts than reason. Thomas Paine, *Common Sense*. Throughout history, some books have changed the world. They have transformed the way we see ourselves and each other. They have inspired debate, dissent, war, and revolution. They have enlightened, outraged, provoked, and comforted. They have enriched lives and destroyed them. *Common Sense* is a pamphlet written by Thomas Paine in 1775-76 that inspired people in the Thirteen Colonies to declare and fight for independence from Great Britain in the summer of 1776, six months before the Declaration of Independence. Thomas Paine's *Common Sense* was a radical and impassioned call for America to free itself from British rule and set up an independent republican government. Savagely attacking hereditary kingship and aristocratic institutions, Paine urged a new beginning for his adopted country in which personal freedom and social equality would be upheld and economic and cultural progress encouraged. His pamphlet was the first to speak directly to a mass audience; it went through fifty-six editions within a year of publication and its assertive and often caustic style both embodied the democratic spirit he advocated and converted thousands of citizens to the cause of American independence. All-time American History bestseller.
