Reactor-grade Plutonium and Nuclear Weapons Gregory S. Jones, Olli Heinonen, 2018 In Reactor Grade Plutonium and Nuclear Weapons Exploding the Myths long time defense analyst Gregory S Jones draws from his decades of research using publicly available unclassified information to debunk the persistent fallacy that reactor grade plutonium cannot be used to build reliable nuclear weapons This belief has long been held by a segment of the nuclear power industry determined to use plutonium as reactor fuel despite its highly uneconomical nature Further this mistaken belief has made reactor grade plutonium readily available to many non nuclear weapon states In the book Jones shows that nuclear weapons can be manufactured using reactor grade plutonium that have the same predetonation probability size and weight as nuclear weapons using weapon grade plutonium In addition to technical analysis the book describes how Sweden and Pakistan planned to use reactor grade plutonium for their nuclear weapons programs and how India may be planning to do so today Jones also details how the U S successfully tested a nuclear weapon using what was truly reactor grade plutonium in 1962 All of this leads Jones to argue for banning plutonium recycling and reprocessing globally

Plutonium in the Environment A. Kudo, 2001-02-23 The first volume of the new series Radioactivity in the Environment focuses on the environmental occurrence the speciation the behaviour the fate the applications and the health consequences of that much feared and much publicised element plutonium Featuring a collection of selected peer reviewed up to date papers by leading researchers in the field this work provides a state of the art description of plutonium in the environment This title helps to explain where present frontiers are drawn in our continuing efforts to understand the science of

environmental plutonium and will help to place widespread concerns into perspective As a whole this new book series on environmental radioactivity addresses at academic research level the key aspects of this socially important and complex interdisciplinary subject Presented objectively and with the ultimate authority gained from the many contributions by the world's leading experts the negative and positive consequences of having a radioactive world around us will be documented and given perspective

Plutonium Greg Roza, 2008-08-15 Plutonium Pu plays a special role in the exploration of space It is also used to create energy in nuclear power plants Despite these useful abilities plutonium is known to be a highly dangerous and controversial element It is used to make nuclear weaponry Exposure to plutonium can make people terminally sick Despite the dangers more than 2 000 tons 1 800 metric tons of the element have been created over the past seventy years Students learn about Glenn Seaborg Arthur Wahl and Joseph Kennedy's discovery of plutonium for the first time by bombarding uranium 238 with deuterons a proton and a neutron in the cyclotron They also explore plutonium's place in the actinide series of the periodic table and its radioactivity its allotropes compounds and alloys and its nuclear applications and dangers

Safety Issues Associated with Plutonium Involvement in the Nuclear Fuel Cycle Theodore A. Parish, Vyacheslav V. Khromov, Igor Carron, 1999-02-28 The VOLGA conferences hosted in odd numbered years by the Department of Theoretical and Experimental Reactor Physics of the Moscow Engineering Physics Institute MEPhI are some of the most prestigious technical meetings held in Russia Traditionally these conferences present the opportunity for reactor physicists from around the world to gather at MEPhI's holiday camp on the banks of the Volga river near Tver to exchange ideas and explore innovative concepts related to nuclear power development In 1997 NATO became involved in the VOLGA meetings for the first time by co-sponsoring VOLGA97 as an advanced research workshop This workshop broke with tradition a bit in that the venue was moved from MEPhI's holiday camp to a location nearer Moscow The workshop program was effectively organized in order to cover a broad range of topics relating to the theme of the meeting Generally the papers concerned safety related questions associated with utilizing both weapons grade and reactor grade plutonium in the nuclear fuel cycle including facility requirements licensing issues proliferation risks and a variety of advanced concepts for alternative fuel cycles The program contained a total of ninety nine papers presented in five days of sessions
