Flessner, John C. Piacentini, 2019-03-12 Bringing together leading authorities, this volume synthesizes the breadth of current research on child and adolescent treatment into a practical handbook for students and clinicians. The book was inspired by the preeminent work on adult disorders. Clinical Handbook of Psychological Disorders now in its sixth edition, edited by David H. Barlow. It provides a concise overview of the disorders most commonly encountered in clinical practice and details evidence-based treatment approaches largely grounded in cognitive behavioral therapy (CBT). Procedures for assessment, diagnosis, case formulation, intervention, and progress monitoring are illustrated with rich, extended case examples, including session transcripts. The book addresses nuts and bolts issues such as how to set up each session, what to cover, and how to broach difficult topics with children and parents. See also Clinical Handbook of Psychological Disorders, Sixth Edition on adults, edited by David H. Barlow. *Terminal Evaluation of "Prevention and Disposal of Persistent Organic Pollutants and Obsolete Pesticides in Eritrea" Phase II* Food and Agriculture Organization of the United Nations, 2020-02-07 Pesticides have helped control disease and increase crop production for food security. However, poor management of pesticides has shown negative impacts on human health and the environment, including death and disability among users. Of particular concern are Persistent Organic Pollutants (POPs) that are highly effective in the control of the insect vectors of malaria and sleeping sickness and locusts. FAO, supported by GEF, implemented a POPs project in Eritrea to safeguard and dispose existing stocks of obsolete pesticides as well as working to reduce risk across the pesticide lifecycle at the policy level. The evaluation found that one of the project's main success was the safeguarding and disposal of 364 tons of obsolete pesticides and its contribution to the nationwide adoption of FFS and IPM. In the future, the evaluation recommends that the Project Steering Committee, with the support of FAO, should take steps to ensure that reducing the risk from pesticides remains a priority for the government.
