Direction & Quality of Light Neil van Niekerk, 2013-03-04 Providing readers with a study of learning how to turn poorly lit images into finely crafted masterfully lit photographs this guidebook instills photographers with the self confidence to think on their feet and photograph any portrait subject anywhere Acclaimed photographer Neil van Niekirk presents seven distinctly different lighting scenarios available light exposure metering a touch of flash bounced on camera flash off camera flash video light and hard sunlight to show readers how to manipulate the direction and quality of light the subject's and

photographer's position and numerous other variables so as to turn a bad image into a stunning professional level portrait. Packed with dozens of instructional full color photos, this work also features 10 sample photo sessions allowing readers the opportunity to see the seven lighting scenarios put to practice. *Nikon Creative Lighting System Digital Field Guide* Benjamin Edwards, 2012-02-15 Detailed coverage of the three high end speedlights built exclusively for new Nikon SLRs. Nikon speedlights put creative control of flash at the photographer's command and with Nikon's Creative Lighting System, flash control is practically intuitive and possibilities are seemingly endless. However, setting up, synchronizing the equipment and determining lighting ratios can be a daunting task. This new edition of a bestseller puts your mind at ease in a flash. Award winning photographer Benjamin Edwards begins with the basics and demystifies the complexities of using multiple speedlights, adjusting flash outputs and setting up a wireless studio in an understandable, approachable way. Teaches you how to fill in shadows, reveal detail and add a sense of motion or visual effects to your images all with automatic ease and total wireless control. Includes coverage of other Creative Lighting System components such as Nikon's wireless commander and macro speedlights. Explores the basic functions of the SB 910, continues with the SB 700 and the similar but less expensive SB 600. Boasts unique, detailed advice on lighting specific subjects: weddings, pets, product shots, corporate locations, portraits, large groups, sports and much more. While the Nikon Creative Lighting System speedlights are like having a low cost wireless studio lighting system that's portable enough to fit in a camera bag, this invaluable guide does fit in your camera bag and goes where you go to help you take control of this amazing lighting system. **Lighting & Design for Portrait**

Photography, 2014-11-17 Some photographers make portraits that we can't take our eyes off of. These images create mood, evoke emotion and pique our curiosity. They have that certain something that other portraits seem to lack. These rare images are memorable, the kind of shots that clients want and photographers strive to emulate. These portraits are technically precise and have style. Neil van Niekerk is a big name in the portrait and wedding photography industry. His masterful photographs get a reaction and he's devoted to helping others create compelling portraits for their clients. In this book, van Niekerk shows readers strategies for creating a wide range of portrait looks: romantic, fun, sweet, dramatic, glamorous or moody, in lackluster, middle of nowhere locales, small home studios, big expanses and even on rooftops. Starting with traditional lighting and posing strategies and moving through spicier varieties, he shows readers how integrating specialized lighting, rim lighting, backlighting, flare and low key lighting using natural light and artificial sources and compositional approaches, shallow depth of field, lens compression and unorthodox perspectives into their creative approach can allow them to take full creative control over their portrait taking process so that they're able to deliver incredible shots of their clients in any photographic conditions. **The Art and Style of Product Photography** J. It's all about light. The ability to see, influence, modify, control, and create light will take your images from snapshots to great shots. In *Lighting for Digital Photography: From Snapshots to Great Shots*, photographer and bestselling author Syl Arena begins with a primer on light itself: how to see its direction, intensity, color, contrast, and hardness, and quickly moves on to discussions of shooting both indoors and outdoors in the many different conditions of natural or man-made light. Then the book digs in to begin creating light with photographic lights, whether that's small flash or big strobe, the pop-up flash on your DSLR, or continuous lights. Follow along with Syl and you will learn the basics and beyond of light modifiers that make light bigger and softer, such as umbrellas, softboxes, beauty dishes, and diffusion panels. Understand how to control and shape the light itself with flags, grids, snoots, and the zoom function on your flash. Appreciate the color temperature of light, whether that's the sun, a light bulb, or a flash, and how to influence it with white balance settings on your camera and colored gels on your flash. Learn how to take great pictures across many different genres, from product and still life images to simple and not-so-simple portraits and group shots. With *Lighting for Digital Photography: From Snapshots to Great Shots*, you'll learn not only how light behaves, you'll learn all you need to know to get started on the journey of creating and controlling light in order to make great shots. And once you've got the shot, show it off! Join the book's Flickr group, share your photos, and discuss how you get great shots at flickr.com/groups/lightingfromsnapshotstogreatshots. *Tony Northrup's Photography Buying Guide* Tony Northrup, 2014-11-26 If you're a beginner photographer, this book can save you hundreds of dollars.
