A New English Dictionary on Historical Principles: part 1. H (1901) James Augustus Henry Murray, 1901

What is What-is? Harvey White, 2005. This book interprets the poem by the pre-Socratic philosopher Parmenides in a way that differs fundamentally from traditional interpretations. While some recent studies show that the poem uses the word *is* as a copula rather than a substantive, a close analysis of the Greek text shows that Parmenides did not deny the reality of a plurality of sense-perceivable objects but argued that each is an individual homogeneous unity that emerged from a mixture of opposite elements. This means that much of the poem that has been taken to describe a position that Parmenides rejects is in fact what he accepts. The book concludes therefore that Parmenides was not the radical and revolutionary thinker to the degree he is commonly portrayed to be; he stands within the intellectual transition occurring in the Greek world moving from the past Homeric mythos into the emerging scientific view of the world.
