Eschatology and the Technological Future

Michael S. Burdett, 2014-12-05 The rapid advancement of technology has led to an explosion of speculative theories about what the future of humankind may look like These technological futurisms have arisen from significant advances in the fields of nanotechnology biotechnology and information technology and are drawing growing scrutiny from the philosophical and theological communities This text seeks to contextualize the growing literature on the cultural philosophical and religious implications of technological growth by considering technological futurisms such as transhumanism in the context of the long historical tradition of technological dreaming Michael Burdett traces the latent religious sources of our contemporary technological imagination by looking at visionary approaches to technology and the future in seminal technological utopias and science fiction and draws on past theological responses to the technological future with Pierre Teilhard de Chardin and Jacques Ellul Burdett's argument arrives at a contemporary Christian response to transhumanism based around the themes of possibility and promise by turning to the works of Richard Kearney Eberhard Jüngel and Jürgen Moltmann Throughout the author highlights points of correspondence and divergence between technological futurisms and the Judeo-Christian understanding of the future

Graham Allen, 2025-05-29 The 21st century has witnessed rapid advances in artificial intelligence giving rise to a society at once hopeful but also mistrustful of the possibilities that this technology offers Our hopes and anxieties have played out across a variety of media in recent times but arguably nowhere more significantly than on our screens This book explores a phenomenon which it calls the new AI cinema and television arguing that since the mid 2010s a distinctly new phase in the representation of AI has occurred Discussing films such as Blade Runner 2049 Ex Machina and Ghost in the Shell alongside television series such as Westworld and Humans it argues that they have moved away from apocalyptic scenarios towards questions of personhood consciousness and social inclusion and exclusion In doing so it intervenes in some of today's most pressing debates including gender representation AI ethics climate catastrophe and the rights of artificially intelligent beings

Technolife 2035

Elina Hiltunen, Kari Hiltunen, 2015-10-05 Technology constantly evolves usually slowly and insidiously but always just as surely Things that are currently being developed in laboratories will be in the public domain as different products and applications perhaps as soon as in a few years time and as more refined versions in around ten years time This book deals with the future of technology and explores the influence new technologies may have on life within the next twenty years It is divided into three parts the first of which discusses technological development and the forces and counter forces related to it This section also reviews how advances in technology are forecasted and what kinds of parties make these predictions and provides examples of forecasts for the next couple of decades The second part of the book investigates the various areas of technology

and their related trends This section discusses current technological studies which may have concrete impacts in everyday life in a few decades such as those in the fields of energy transportation biotechnology materials ICT robotics medical technology and space technology The third part of the book introduces the authors visions of how technology may develop by 2035 and presents three different scenarios or future worlds These will demonstrate the possible directions in which technological development can take us The scenarios are introduced through two main characters Romeo and Juliet adapted from Shakespeare s play in the year 2035 Even though technology is constantly changing the writers believe that even years into the future the significance of human relations will remain the greatest influence on human life
