Instructions: Read the following passage about the concept of The Great Depression in US History. Then answer the questions on the information.

The Great Depression: A Convergence of Economic Catastrophes

The Great Depression, the most severe economic downturn in modern history, gripped the United States and the world from 1929 to the late 1930s. This devastating crisis was not caused by a single event, but rather a confluence of factors that exposed underlying weaknesses in the global economic system and triggered a downward spiral of declining demand, production, and employment.

One of the primary causes of the Great Depression was the 1929 stock market crash on Wall Street. This catastrophic event, fueled by speculation and overinflated stock prices, wiped out billions of dollars in wealth and shattered investor confidence. The crash triggered a chain reaction of bank failures, as panicked depositors withdrew their savings, further contracting the money supply and credit availability.

The Smoot-Hawley Tariff Act of 1930, a misguided attempt to protect American industries, exacerbated the crisis by triggering retaliatory tariffs from other countries, leading to a sharp decline in international trade. This, in turn, reduced demand for American goods, causing further economic contraction.
