The prevalence of both depression and anxiety was 6.1%. The prevalence of depression and anxiety was higher among females than males. The prevalence of depression and anxiety was higher among adolescents who were in the lowest socioeconomic quartile than those in the highest quartile. **Conclusions:** The prevalence of self-reported depression and anxiety among young adults in the United States is high. The prevalence of both depression and anxiety is higher among females than males and higher among adolescents who were in the lowest socioeconomic quartile than those in the highest quartile.
