Directions in Education Policy Implementation Meredith I. Honig,2006-07-13 A companion to Allan R Odden s *Education Policy Implementation* also published by SUNY Press this book presents original work by a new generation of scholars contributing to education policy implementation research The contributors define education policy implementation as the product of the interaction among particular policies people and places Their analyses of previous generations of implementation research reveal that contemporary findings not only build directly on lessons learned from the past but also seek to deepen past findings These contemporary researchers also break from the past by seeking a more nuanced contingent and rigorous theory based explication of how implementation unfolds They argue that researchers and practitioners can help improve education policy implementation by not asking simply what works but rather focusing their attention on what works for whom where when and why *Naturalistic Decision Making* Caroline E. Zsombok,Gary

Klein,2014-01-02 If you aren t using the term naturalistic decision making or NDM you soon will be Even as a very young field NDM has already had far reaching applications in areas as diverse as management aviation health care nuclear power military command and control corporate teamwork and manufacturing Put simply NDM is the way people use their experience to make decisions in the context of a job or task Of particular interest to NDM researchers are the effects of high stake consequences shifting goals incomplete information time pressure uncertainty and other conditions that are present in most of today s work places and that add to the complexity of decision making Applications of NDM research findings target decision aids and training that help people in their decision making processes This book reports the findings of top NDM researchers as well as many of their current applications In addition the book offers a historical perspective on the

emergence of this new paradigm describes recent theoretical and methodological advancements and points to future developments It was written for people interested in decision making research and applications relative to a diverse array of work settings and products such as human computer interfaces decision support systems individual and team training product designs and organizational development and planning
