 Rubenstein,Leah A. Krubitzer,2016-11-23 Evolution of Nervous Systems Second Edition Four Volume Set is a unique major  
 reference which offers the gold standard for those interested both in evolution and nervous systems All biology only makes  
 sense when seen in the light of evolution and this is especially true for the nervous system All animals have nervous systems  
 that mediate their behaviors many of them species specific yet these nervous systems all evolved from the simple nervous  
 system of a common ancestor To understand these nervous systems we need to know how they vary and how this variation  
 emerged in evolution In the first edition of this important reference work over 100 distinguished neuroscientists assembled  
 the current state of the art knowledge on how nervous systems have evolved throughout the animal kingdom This second  
 edition remains rich in detail and broad in scope outlining the changes in brain and nervous system organization that  
 occurred from the first invertebrates and vertebrates to present day fishes reptiles birds mammals and especially primates

including humans The book also includes wholly new content fully updating the chapters in the previous edition and offering brand new content on current developments in the field Each of the volumes has been carefully restructured to offer expanded coverage of non mammalian taxa mammals primates and the human nervous system The basic principles of brain evolution are discussed as are mechanisms of change The reader can select from chapters on highly specific topics or those that provide an overview of current thinking and approaches making this an indispensable work for students and researchers alike Presents a broad range of topics ranging from genetic control of development in invertebrates to human cognition offering a one stop resource for the evolution of nervous systems throughout the animal kingdom Incorporates the expertise of over 100 outstanding investigators who provide their conclusions in the context of the latest experimental results Presents areas of disagreement and consensus views that provide a holistic view of the subjects under discussion Adventure ,1920
