Physics for Global Scientists and Engineers, Volume 2 Raymond A. Serway, John W. Jewett, Wayne (California State Polytechnic University Rowlands, Pomona), Kate Wilson, Wayne Rowlands, Anna (University of Canberra Wilson, Australian National University), 2016-10-01 This second edition of Serway's Physics For Global Scientists and Engineers is a practical and engaging introduction for students of calculus based physics. Students love the Australian Asia Pacific and international case studies and worked examples, concise language and high quality artwork in two easy to carry volumes. NEW key topics in physics such as the Higgs boson engage students and keep them interested. NEW Maths icons highlight mathematical concepts in the text and direct students to the relevant information in the Maths Appendix. NEW Index of Symbols provides students with a quick reference for the symbols used throughout the book. This volume two includes Electricity and magnetism, Light and optics and Quantum physics. Volume one covers Mechanics: Mechanical properties of solids and fluids, Oscillations and mechanical waves and Thermodynamics.

Process Plant Equipment Michael D. Holloway, Chikezie Nwaoha, Oliver A. Onyewuenyi, 2012-08-20 Process Plant Equipment Book is another great publication from Wiley as a reference book for final year students as well as those who will work or are working in chemical production plants and refinery. Associate Prof Dr Ramli Mat, Deputy Dean Academic Faculty of Chemical Engineering, Universiti Teknologi Malaysia give s readers access to both fundamental information on process plant equipment and to practical ideas, best practices and experiences of highly successful engineers from around the world. The book is illustrated throughout with numerous black white photos and diagrams and also contains case studies demonstrating how actual process plants have implemented the tools and techniques discussed in the book. An extensive list of references enables readers to explore each individual topic in greater depth.

Stainless Steel World and Valve World November 2012 Discover how to optimize process plant equipment from selection to operation to troubleshooting. From energy to pharmaceuticals to food, the world depends on processing plants to manufacture the products that enable people to survive and flourish. With this book as their guide, readers have the information and practical guidelines needed to select, operate, maintain, control and troubleshoot process plant equipment so that it is efficient, cost effective and reliable throughout its lifetime. Following the authors' careful explanations and instructions, readers will find that they are better able to reduce downtime and unscheduled shutdowns, streamline operations and maximize the service life of processing equipment.

Process Plant Equipment: Operation, Control and Reliability is divided into three sections. Section One: Process Equipment Operations covers such key equipment as valves, pumps, cooling towers, conveyors and storage tanks. Section Two: Process Plant Reliability sets forth a variety of tested and proven tools and methods to assess and ensure the reliability and mechanical integrity of process equipment, including failure analysis, Fitness for Service assessment, engineering economics for chemical processes and process component function and performance criteria. Section Three: Process Measurement, Control and Modeling examines flow meters, process control and process modeling and

simulation Throughout the book numerous photos and diagrams illustrate the operation and control of key process equipment There are also case studies demonstrating how actual process plants have implemented the tools and techniques discussed in the book At the end of each chapter an extensive list of references enables readers to explore each individual topic in greater depth In summary this text offers students process engineers and plant managers the expertise and technical support needed to streamline and optimize the operation of process plant equipment from its initial selection to operations to troubleshooting
