Planning and Place in the City Marichela Sepe, 2013-03-05 Under the influence of globalization the centres of many cities in the industrialised world are losing their place identity the set of cultural markers that define a city's uniqueness and make it instantly recognisable A key task for planners and residents working together is to preserve that unique sense of place without making the city a parody of itself In *Planning and Place in the City* Marichela Sepe explores the preservation reconstruction and enhancement of cultural heritage and place identity She outlines the history of the concept of placemaking and sets out the range of different methods of analysis and assessment that are used to help pin down the nature of place identity This book also uses the author's own survey based method called PlaceMaker to detect elements that do not feature in traditional mapping and identifies appropriate planning interventions Case studies investigate cities in Europe North America and Asia which demonstrate how surveys and interviews can be used to draw up an analytical map of place identity This investigative work is a crucial step in identifying cultural elements which will influence what planning decisions should be taken in the future The maps aim to establish a dialogue with local residents and support planners and administrators in making sustainable changes The case studies are amply illustrated with survey data sheets photos and coloured maps Innovative and broad based *Planning and Place in the City* lays out an approach to the identification and preservation of place and cultural heritage suitable for students academics and professionals alike

Urban Planning and Cultural Identity William Neill, 2003-10-23 *Urban Planning and Cultural Identity* reviews the intense spatiality of conflict over identity construction in three cities where culture and place identity are not just post modernist playthings but touch on the raw sensibilities of who people define themselves to be Berlin as the reborn German capital has put coming to terms with the Holocaust and the memory of the GDR full square at the centre of urban planning Detroit raises questions about the impotence and complicity of planners in the face of the most extreme metropolitan spatial apartheid in the United States and where African American identity now seems set on a separatist course In Belfast in the clash of Irish nationalist and Ulster unionist traditions place can take on intense emotional meanings in relation to which planners as mediators of space can seem ill equipped The book drawing on extensive interview sources in the case study cities poses a question of broad relevance Can planners fashion a role in using environmental concerns such as Local Agenda 21 as a vehicle of building a sense of common citizenship in which cultural difference can embed itself

Regional and Local Economic Development Cliff Hague, Carrie Breitbach, 2017-08-24 From the growth of a multi billion dollar high technology corridor in Malaysia to conflict over housing development in Chicago the practice of regional and local economic development around the world is both dynamic and diverse *Regional and Local Economic Development* introduces the theory behind economic

development and provides examples of successful and less successful practice This broad ranging new text shows how government private industry and individuals combine to achieve economic development It examines the development of policies and practices in recent decades such as eco industrial parks place marketing and social enterprises and analyzes the ways in which contemporary regional economies are changing It also summarizes the key academic debates and reviews the main concepts which inform policy making Truly global in scope with case studies from over 30 countries this book will be welcomed by students and practitioners alike

A Place called Nunavut Kim van Dam,2008-12-31 In 1999 Nunavut Territory was created in the Canadian Arctic The area is about 50 times as large as the Netherlands and is inhabited by a population of 30 000 85% of the population is Inuit the indigenous people in this area The central questions in this research project are what place or regional identities are being ascribed to Nunavut by different groups of people from within and from outside the region and how do these identities work In the process of the formation of the region the territorial Government of Nunavut is an important actor in producing a regional identity that is based on the cultural identity of the Inuit the Inuit Homeland This official regional identity creates a symbolic unity that is important in linking people to the region and through which the land the history and the people are united in a new territorial membership However there is no reason to assume that there is only one regional identity for Nunavut Different individuals or groups of people from within and from outside the region such as the people who live in one of the 25 communities and those who work for the multinational mining corporations or as tourist operators are also involved in the production and reproduction of identities for Nunavut They represent Nunavut for example as a place to live a resource region a wilderness or as a sustainable place Nunavut Government also links these alternative identities to the area because as a government they are not only interested in protecting Inuit culture but also aim to modernize the economy in order to enhance prosperity and well being As such the place identities are hybrid and identities that before were produced only by external actors are now also being produced by internal actors and vice versa
