Committee on Interior and Insular Affairs, 1973 *Test Equating, Scaling, and Linking* Michael J. Kolen, Robert L. Brennan, 2013-03-14 Test equating methods are used with many standardized tests in education and psychology to ensure that scores from multiple test forms can be used interchangeably In recent years researchers from the education psychology and statistics communities have contributed to the rapidly growing statistical and psychometric methodologies used in test equating This book provides an introduction to test equating which both discusses the most frequently used equating methodologies and covers many of the practical issues involved This second edition expands upon the coverage of the first edition by providing a new chapter on test scaling and a second on test linking Test scaling is the process of developing score scales that are used when scores on standardized tests are reported In test linking scores from two or more tests are related to one another Linking has received much recent attention due largely to investigations of linking similarly named tests from different test publishers or tests constructed for different purposes The expanded coverage in the second edition also includes methodology for using polytomous item response theory in equating The themes of the second edition include the purposes of equating scaling and linking and their practical context data collection designs statistical methodology designing reasonable and useful equating scaling and linking studies importance of test development and quality control processes to equating equating error and the underlying statistical assumptions for equating Given the perennial debates about academic standards and grade inflation it is my view that tools such as those described in this book should be adopted much more widely by the academic community than they are at present This book provides an excellent overview and I strongly recommend it Short Book Reviews of the ISI April 2005 I highly recommend this book to everybody who has any interest in equating and linking be they a student practitioner or researcher Psychometrika 2006 *Land Survey and Large-scale Mapping in Sub-Saharan Africa*, 2001 *Catalogue of the Public Documents of the [the Fifty-third] Congress [to the 76th Congress] and of All Departments of the Government of the United States* United States. Legislative History: Saline Water Conversion Act ,1961 Legislative History: Saline Water Conversion Act C. Richard Boehlert,1971 **The Relation between Large-Scale Land Acquisitions and Rural Households** Giulia Barbanente,2020-03-31 Giulia Barbanente investigates the impact of large scale foreign land acquisitions LSLAs on rural households in Ethiopia and Tanzania Given the scale of LSLAs happening in developing countries there is urgent need to objectively assess whether risks for smallholders are balanced by positive economic outcomes The author considers four key pathways of influence of LSLAs on rural households access to land returns to land returns to labor and price of agricultural goods The four pathways are tested on the background of Ethiopia s and Tanzania s land tenure systems which are strikingly different The evidence shows several elements of similarity in the reported effect of LSLAs on the defined indicators of households welfare in the two countries **Landscape-scale Conservation Planning** Stephen C. Trombulak,Robert Baldwin,2010-09-21 Hugh P Possingham Landscape scale conservation planning is coming of age In the last couple of decades conservation practitioners working at all levels of governance and all spatial scales have embraced the CARE principles of conservation planning Comprehensiveness Adequacy Representativeness and Efficiency Hundreds of papers have been written on this theme and several different kinds of software program have been developed and used around the world making conservation planning based on these principles global in its reach and influence Does this mean that all the science of conservation planning is over that the discovery phase has been replaced by an engineering phase as we move from defining the rules to implementing them in the landscape This book and the continuing growth in the literature suggest that the answer to this question is most definitely no All of applied conservation can be wrapped up into a single sentence what should be done the action in what place at what time using what mechanism and for what outcome the objective It all seems pretty simple what where when how and why However stating a problem does not mean it is easy to solve
