

The background of the entire image is a dynamic space battle. In the upper left, a large, dark, angular carrier ship is shown firing a powerful yellow energy beam towards the right. In the lower half, a massive, elongated dreadnought ship is seen from a low angle, appearing to rise from the surface of a planet. It has a complex, multi-segmented design with various orange and yellow lights. The planet's surface is visible at the bottom, showing a mix of white and grey terrain. The sky is a deep blue with streaks of light and smaller ships in the distance.

Planet Strike Extinction Wars:

Planet Strike Vaughn Heppner, 2014-03-08 Earth's last Assault Troopers storm an alien ship the size of a planet. After escaping from the Jelk Corporation and hijacking a battlejumper, Creed thought he was free of the extraterrestrials and their war. Now the Lokhars want to hire him, offering advanced technology to clean the radioactive Earth and starships to defend the Solar System. The mission: After untold centuries, an ancient planet-sized vessel has gone online, opening a gateway to a collapsing universe. Anti-life aliens are coming through. Before it's too late, the assault troopers have to storm the ship and seal the portal. Creed will do anything to save the last remnants of humanity, but this will be a commando raid like no other against an enemy that shouldn't exist. Creed will need all his cunning and determination if he hopes to bring his people back alive.

International Seminar On Nuclear War And Planetary Emergencies - 32nd Session: The 32nd Session Of International Seminars And International Collaboration Richard C Ragaini, 2005-06-20 This volume contains the proceedings of the 32nd International Seminar on Nuclear War and Planetary Emergencies, which was attended by global leaders in their scientific fields, advisors to presidents, defence secretaries, and high-level diplomats. Readers are invited to participate in the fascinating debate on the wide range of subjects covered, including migration, global warming, pollution, the cultural planetary emergency, AIDS, and infectious diseases, water conflicts, and energy. The proceedings have been selected for coverage in *Index to Scientific Technical Proceedings*, *ISTP*, *ISI Proceedings*, *Index to Scientific Technical Proceedings*, *ISTP CDROM*, *version ISI Proceedings*, *Index to Social Sciences Humanities Proceedings*, *ISSHP*, *ISI Proceedings*, *Index to Social Sciences Humanities Proceedings*, *ISSHP CDROM*, *version ISI Proceedings*, *CC Proceedings*, *Engineering Physical Sciences*, *CC Proceedings*, *Biomedical Biological Agricultural Sciences*. *War and Algorithm* Max Liljefors, Gregor Noll, Daniel Steuer, 2019-10-11 New military technologies are animated by fantasies of perfect knowledge, lawfulness, and vision that contrast sharply with the very real limits of human understanding, law, and vision. Thus, various kinds of violent acts are proliferating while their precise nature remains unclear. Especially, man-machine ensembles guided by algorithms are operating in ways that challenge conceptual understanding. *War and Algorithm* looks at the increasing power of algorithms in these emerging forms of warfare from the perspectives of critical theory, philosophy, legal studies, and visual studies. The contributions in this volume grapple with the challenges posed by algorithmic warfare and trace the roots of new forms of war in the technological practices and forms of representation of the digital age. Together, these contributions provide a first step toward understanding and resisting our emerging world of war. [International Seminar On Nuclear War And Planetary Emergencies - 43rd Session](#) Richard C Ragaini, 2011-06-08 Proceedings of a seminar focusing on planetary emergencies followed in a multidisciplinary approach since 1980 by permanent monitoring panels. *Planetary Defense* Nikola Schmidt, 2018-12-26 Planetary defense from near-Earth objects such as asteroids is a far more nuanced and challenging topic than it might seem. Each day, technology is making it easier to detect asteroid impact threats in advance, but

at present there is still no easy way to design and implement any form of global defense This book examines how various asteroid deflection methods can change global political affairs The authors believe that the final policy for potential Earth impacts should be based on practical engineering solutions and innovative architectural structures while at the same time reflecting the most recent political science contributions in ethical security studies and security cosmopolitanism Their focus is not limited to effective engineering solutions but rather extends to how such proposals resonate in possible political structures of the future Planetary defense cannot be achieved with technology alone the chapters in this volume highlight the issues that arise when space science and technology intersect with political science This complex interdisciplinary project not only demands global participation and collaboration but also proposes the way we can achieve it The authors explore various concepts of governance and their far reaching implications for planetary defense and vice versa how scientific progress in Solar System observations and asteroid collision engineering influence political science and put pressure on the international legal framework The text is intentionally written for a diverse scholarly and diplomatic audience in a style accessible to non specialists and practitioners and can be read by those across diverse disciplinary backgrounds

Six Minutes to Winter Mark Lynas, 2025-05-08 Terrifying and timely this is a book everyone should read and heed George Monbiot Urgent gripping and sobering Six Minutes to Winter is a hair raising wake up call David Wallace Wells Powerful and insightful Although many have forgotten about nuclear weapons we shouldn't Charles Oppenheimer The world is currently closer to superpower conflict than at any time since the 1962 Cuban Missile Crisis World War III is a real possibility and with 12 000 warheads in the arsenals of more than half a dozen countries we are standing on a nuclear knife edge Despite receiving very little attention nuclear war is a far greater threat to humanity's immediate survival than climate change While climate heating threatens humanity over many decades nuclear war could destroy civilisation in just a few hours A major missile exchange would mean months of near total darkness followed by a decade long global nuclear winter that would destroy most life on Earth Virtually everyone would starve in the resulting worldwide famine and there would be no reliable refuge We are sleepwalking to Armageddon There are no mass marches no COPs no nuclear Greta But the climate experience teaches us that ignoring a problem is no solution and that a worldwide mobilisation can work Six Minutes to Winter presents an unflinching view of the nuclear nightmare but also describes how weapons can be taken off hair trigger alert and ultimately abolished altogether If human civilisation is to survive long term we have no alternative
