The Moving Form of Film Lúcia Nagib, Stefan Solomon, 2023 *The Moving Form of Film* Historicizing the Medium through Other Media charts the ways in which crossing borders between film and other arts and media can provide an encompassing inclusive and non teleological understanding of film history Evolutionary narratives of cinema have traditionally adopted the Second World War as a watershed that separates classical Hollywood films from modern European productions a scheme that subjects the entire world to the cinematic history of two hegemonic centres In turn histories of film as a technological medium have focused on the specificity of cinema as it gradually separated from the other art and medial forms theatre dance fairground spectacle painting literature still photography and other pre cinematic modes Taking an ambitious step forward with relation to these approaches this book focuses on the fluid quality of the film form by exploring an array of exciting and often neglected artistic expressions worldwide as they compare and interconnect films across temporal geographical and cultural borders By observing the ebb and flow of film s contours within the bounds of other artistic and medial expressions the chapters aspire to establish a flexible historical platform for the moving form of film posited from production to consumption as a transforming and transformative medium

Conjunctions of Mind, Soul and Body from Plato to the Enlightenment Danijela Kambaskovic, 2014-09-25 This book examines the nexus between the corporeal emotional spiritual and intellectual aspects of human life as represented in the writing of the Middle Ages and the Renaissance Authors from different fields examine not only the question of the body and soul or body and mind but also how this question fits into a broader framework in the medieval and early modern period Concepts such as gender and society morality sexuality theological precepts and medical knowledge are a part of this broader framework This discussion of ideas draws from over two thousand years of Western thought from Plato in the fifth century BC and the fourth century Byzantine dialogues on the soul to the philosophical and

medical writings of the early 1700s There are four sections to this book each section is based on where the authors have found a conjunction between the body and mind soul The work begins with a section on text and self perception which focuses on creative output from the period The second conjunction is human emotions which are described in their social contexts The third is sex where the human body and mind are traditionally believed to meet The fourth section Material Souls engages with bodies and other material aspects of existence perceived studied or utilised as material signs of emotional and spiritual activity
