Hint: In order to identify interfaces at either side of a geometry line, a positive sign (+) or negative sign (-) is added. This sign has no physical relevance or influence on the results.

- » A *Virtual thickness factor* can be defined for interfaces. This is a purely numerical value, which can be used to optimise the numerical performance of the interface. To define it, select the interface in the drawing area and specify the value to the *Virtual thickness factor* parameter in the *Selection explorer*. Non-experienced users are advised not to change the default value. For more information about interface properties see the Reference Manual.
