other new language learning settings The number and variety of languages involved both as the first language e g English Finnish Basque Spanish Japanese French Italian Catalan as well as the target foreign language e g English French Italian Japanese Spanish makes the volume specially attractive Additionally the different approaches adopted by the researchers participating in this volume such as information processing sociocultural theory or conversation analysis widen the realm of investigation on discourse and language learning Finally the strength of the volume also lies in the range of educational settings primary secondary and tertiary education and the worldwide representation of contributors across seven different countries namely those of Spain France Austria Finland Germany Canada Australia and the United States The uniqueness of the volume is due to its eclectic and comprehensive nature in tackling instructional discourse Worldwide outstanding researchers like Julianne House Carme Muñoz Ute Smit Tarja Nikula or Roy Lyster to quote but a few adopt different perspectives in this joint contribution that will certainly broaden the scope of research on language learners discourse
