The Professions and Civic Life Gary J. Schmitt, 2016-06-10 Professions are institutions which through their small size self governing elements and sense of social mission can assist in maintaining a sound civic culture As mediating institutions in our democratic society that are neither entirely birthed by the state nor are entirely private the individual professions such as the legal and education professions journalism economics architecture or the military arguably present practical avenues through which to teach civic behavior and to restore Americans broken trust This volume on the professions and civic life undertakes a unique and timely examination of twelve individual professions to see how each affects the character of American citizenship and the civic culture of the nation through their practices and ethos Among the questions each essay in the volume addresses are What is distinctive or not about the specific profession as it came to be practiced in the United States Given the specialized knowledge training and sometimes licensing of a profession what do the professions perceive to be their role in promoting the larger common good How can we bring professionals expert knowledge to bear on social problems in an open and deliberative way Is the ethic of a particular profession as it understands itself today at odds with the American conception of self government and a healthy civic life Through analysis of these questions each chapter presents a rich treatment of how the twelve longstanding professions of political science teaching the law the military economics medicine journalism literature science architecture music and history help support and challenge the general public's civic behavior in general and their attachment to the American regime in particular

The Political Effects of Entertainment Media Anthony Gierzynski, 2020-07-08 Entertainment media are rife with material that touches on the political The stories with which we entertain ourselves often show us for better or worse that everything can be solved by the rise of an individual hero and that the best way to deal with a bad guy with a gun is a good guy with a gun Our stories portray individuals along the lines of gender racial and ethnic stereotypes offer us villains that are one dimensional characters driven by evil and show us politicians who are almost always corrupt self serving and or incompetent They offer up models for how to deal with oppressive authority and they typically portray worlds that are just where those who do the right thing come out on top Entire entertainment genres with their shared story telling conventions and common plot devices provide lessons and perspectives that are relevant to how the public sees political issues The stories that entertain us show us all these things and more but to what effect Does the pervasive politically relevant content that can be found not just in political entertainment shows like House of Cards but also in entertainment like Game of Thrones that on the surface has nothing to do with modern politics affect people's perspectives on the political world That is the central question of this volume This book discusses the type of content in entertainment media that has the best chance of influencing political beliefs draws from the work of scholars in a number of disciplines in order to forge a theory explaining how and when entertainment media will affect political perspectives and presents a series of empirical studies using experiments and surveys that demonstrate the

effect of politically relevant content in shows such as Game of Thrones House of Cards The Daily Show and The Colbert Report in genres such science fiction and through pervasive villain and leader character types Conspiracy Theories Joseph E. Narrating European Society Hans-Jörg Trenz, 2016-03-21 Trenz introduces a sociological perspective on European integration by looking at different accounts of Europeanization as society building He observes how Europeanization unfolds in ongoing practices and discourses through which social relations among the Europeans are redefined and re embedded The chapters describe how the project of European integration has been powerfully launched in postwar Europe as a normative venture that comprises polity and society building how this project became ingrained in every day life histories and experiences of the Europeans how this project became contested and confronted resistances and ultimately how it went through its most severe crisis A sociology of European integration is thus outlined along four main themes or narratives first the elite processes of identity construction and the framework of norms and ideas that carries such a construction together with notions of European identity EU citizenship etc second the socialization of European citizens processes of banal Europeanism and social transnationalism through everyday cross border exchanges third the mobilization of resistance and Euroscepticism as a fundamental and collectively mobilized opposition to processes of Europeanization and fourth the political sociology of crisis linked not only to financial turmoil but also more fundamentally to a legitimation crisis that affects Europe and the democratic nation state

Polarization and Political Party Factions in the 2020 Election Christopher J. Galdieri, Jennifer C. Lucas, Tauna Starbuck Sisco, 2022-04-13 This volume explores the conflict between two forces party polarization and party factionalism The major change in America's two political parties over the past half century has been increased polarization which has led to a new era of heightened inter party competition resulting in stronger and more cohesive parties At the same time elections particularly primaries often reveal deep internal factional divisions within both the parties and the 2020 election was no different The Democratic coalition typically pits moderate or establishment candidates against progressive activists and candidates while the Republican Party in 2020 was at times polarized not only between moderates and conservatives but between those willing to criticize President Trump and those who would not How did these two opposing forces shape the outcome of the 2020 election and what are the consequences for the future of American party politics and elections

Civic Education in the Twenty-First Century Donald M. Gooch, Michael T. Rogers, 2015-09-18 Imagine an America where politicians governmental institutions schools new technologies and interest groups work together to promote informed engaged citizens Civic Education in the Twenty First Century brings together scholars from various disciplines to show how such a United States is possible today Inspired by Alexis de Tocqueville's analysis of American democracy in the early 1800s this edited volume represents a multidimensional evaluation of civic education in its new and varied forms While some lament a civics crisis in America today Civic Education in the Twenty First

Century raises hope that we can have an informed and active citizenry We find the activities of a number of politicians government institutions schools and interest groups as promising developments in the struggle to educate and engage Americans in their democracy New technologies and new innovations in civic education have laid the foundation for a revitalized American civic ecology With Civic Education in the Twenty First Century we call for the United States to make these practices less isolated and more common throughout the country The volume is broken into three major sections First there are four chapters exploring the history and philosophical debates about civic education particularly with respect to its role in America s educational institutions Then the second section provides seven groundbreaking inquiries into how politicians and political institutions can promote civic education and engagement through their routine operations As some examples this section explores how politicians through campaigns and judiciaries through community programs enhance civic knowledge and encourage civic engagement This section also explores how new technologies like the Internet and social media are increasingly used by government institutions and other entities to encourage a more politically informed and engaged citizenry Finally the third section contains six chapters that explore programs and practices in higher education that are enhancing civic education engagement and our knowledge of them From the virtual civics campus of Fort Hayes State to citizens academies throughout the country this section shows the possibilities for schools today to once again be civics actors and promoters

The Mediation of Poverty Joanna Redden, 2014-02-19 The Mediation of Poverty The News New Media and Politics discusses the influence of the increasing use of digital technologies on media and political responses to poverty in the United Kingdom and Canada Considering poverty politics at symbolic and structural levels Joanna Redden uses a frame analysis of mainstream and alternative news content to identify which narratives dominate poverty coverage what is missing from mainstream news coverage and what can be learned by looking at alternative sources of news and information The Mediation of Poverty argues that news coverage privileges and embeds neoliberal approaches to the issue of poverty in Canada and the United Kingdom Interviews with journalists politicians researchers and activists enable discussion on a micro level of the changing nature of news politics and activism and how these changes influences poverty politics Redden raises concerns about how the speed of digitally mediated working environments is reshaping even foreclosing opportunities for communication reflection and contestation in a way that reinforces the dominance of market based thinking and limits political responses to poverty
