

Activity 1.1.2 Investigating Basic Circuits (DMS)

Introduction

What is an electrical circuit? How can you manipulate components and design a circuit that will do what you want it to? This guided activity will introduce you to some components, tools, and concepts that are fundamental in electronics. It will allow you to investigate and discover:

- What are voltage, current, and resistance? How are they related to one another?
- What are some of the basic components that make up simple circuits and what do they do?
- What are the important characteristics of a circuit and how do I measure different parts of a circuit?
- How do I measure voltage in a circuit?
- How does the arrangement of components affect the characteristics of the circuit?
- How do I work safely with circuits?
- How can I use calculations to design circuits before I start creating one?
