

Activity 6.3 Functional Analysis Automoblox

Introduction

You have performed a visual analysis of your Automoblox vehicle to identify the visual design principles and elements that give the object its visual appeal, or lack thereof. The next step in the reverse engineering process involves the study of the object's function. This is done through careful observation of the object's sequential operation before it is disassembled. By first observing the product, you can hypothesize how a product operates and then compare your predictions to your actual findings after the part is dissected.

In this activity, you will perform a functional analysis of your Automoblox vehicle

Equipment

- Example product observation
- Engineering notebook
- Pencil
- Automoblox vehicle

Procedure

Before measurement and dissection, theorize how the various sub-systems of the toy function through non-destructive observation. Study the toy and then respond to the following.
