François-Marc Gagnon, 2011-09-29 Part art part science part anthropology this ambitious project presents an early Canadian
perspective on natural history that is as much artistic and fantastical as it is encyclopedic Edited and introduced by Fran ois
Marc Gagnon The Codex Canadensis and the Writings of Louis Nicolas showcases an intriguing attempt to document the life
of the new world flora fauna and aboriginal The book brings together for the first time the illustrated Codex Canadensis and
The Natural History of the New World following Gagnon s argument that both can be attributed to Louis Nicolas a French
Jesuit priest who travelled throughout Canada between 1664 and 1675 Histoire Naturelle des Indes Occidentales originally
written in classical French has been put in modern French by R al Ouellet and translated into English by Nancy Senior The
Natural History presents a pre Linnaean botany and pre Darwinian account of living things including hundreds of species of
plants and vivid descriptions of wildlife It is thoroughly annotated focusing on the contemporary identification of species as
the result of a pan Canadian collaboration of experts in fields from linguistics to biology and botany The Codex Canadensis
currently in the collection of the Gilcrease Museum in Tulsa Oklahoma is reproduced in full and provides both a fascinating
visual account of wildlife as Nicolas saw it and a rare example of early Canadian art Gagnon s introduction profiles Louis
Nicolas and analyses connections between his work and European examples of natural illustration from the period The Codex
Canadensis and the Writings of Louis Nicolas shows how the wildlife and native inhabitants of the new world were
understood and documented by a seventeenth century European and makes available fundamental documents in the history
