does very often going the extra mile in pursuing results With a visible ability to think outside the box George enhances the dynamics of any group he participates in George Jucan PMP Director PMI SOC Board of Directors Lead Contributor PMBOK R Guide Fourth Edition Project Manager Competency Development Framework Second Edition and Government Extension to the PMBOK R Guide Third Edition I worked with George on different volunteering initiatives George is very enthusiastic fast learner eager to deliver results and fun to work with George delivers high quality results while keeping time constraints in mind Felix Moshkovich PMP CMC PMI SOC Director Professional Development PMI SOC Board of Directors I had first hand experience using this book during my PMP preparation and I passed in my first attempt The mind maps concept is a powerful and fast track tool in the learning process and they are used on this book in a way that helps you assimilate the PMBOK processes You will certainly find this book helpful in your PMP preparation Fortunato Couto PMP Getting your Project Management Professional PMP designation is an investment in both yourself and your career George Balana and his teachings allowed me to pass my PMP Exam on my first attempt His PMBOK MindMapping Guide was useful for prepping for the exam Long after the exam it still provides a quick reference guide to rekindle acquired knowledge RLavigne42 Robert Lavigne PMP

Introduction to Biological and Small Molecule Drug Research and Development James

Samanen,2013-05-07 Successful drugs have a good return on investment by bringing in considerably more revenue than the expenses of discovery development and manufacturing Successful drugs pay for all drug projects those that fail and those that have yet to fail or succeed Most research and development R D projects fail Since R D is the future of the company a lot is at stake in the business of R D This chapter considers the organization of biopharmaceutical R D as well as various organizational experiments that are already under way that deal with the enormous risk and cost of biopharmaceutical R D There is a fairly uniform sequence of events involved in the discovery and development of biopharmaceuticals The Stage Gate Organization of the project pipeline is described along with stage related goals The high attrition in the industry is examined as well as reasons for project failure particularly in the clinic The fact that most projects fail in the biopharmaceutical industry means that risk the probability that a project will fail influences a number of key behaviours in biopharmaceutical R D The manner in which risk influences probability of success cost value and corporate commitment is considered Not all discoveries occur within a company many are in licenced Reduced revenues challenge a company s ability to develop all its assets increasing the demands on project and portfolio management and for out licencing or partnering In large biopharmaceutical companies resource tends to be organized into business units therapy areas line departments and platform technology groups In the new era of reduced profits many companies are moving away from vertical integration towards decentralization performing many to most functions in other companies and in the extreme towards virtual drug discovery and development The risks and benefits with the external allocation of resource via outsourcing and partnering are discussed Experiments with the organizational model of biopharmaceutical R D are explored which aim to reduce risk

increase success and efficiency including attempts to be big and small at the same time planning for failure and open innovation There are also external revenue challenges including generics competition and third party payer constraints On the upside are a number of opportunities to increase revenue including new biologics and new areas of exploration epigenetics and gene therapy and by expanding markets into rapidly developing countries Managers face complex challenges to the business of biopharmaceutical R D But regardless of the type of company or set of partnered companies academic institutions and service organizations that perform biopharmaceutical R D to a large extent the sequence of events in which a drug is discovered and developed will always be the same And as long as the industry can continue to find new therapies that positively impact the lives of patients it will continue to be an exciting and challenging industry **A Roadmap to**
