*Tyranny of the Textbook* Beverlee Jobrack,2011-12-23 Educational reforms and standards have been a

topic of public debate for decades with the latest go round being the State Common Core Curriculum Standards But time and again those reforms have failed and each set of standards no matter how new and different has had little impact on improving student achievement Why The textbooks Textbooks sell based on design and superficial features not because they are based on the latest research on how children learn and how well they promote student achievement In Tyranny of the Textbook Beverlee Jobrack retired from educational publishing sheds light on why this happens She gives an engaging and fascinating look behind the scenes of how K 12 textbooks are developed written adopted and sold And perhaps most importantly she clearly spells out how the system can change so that reforms and standards have a shot at finally being effective Did you know Reform efforts have focused on writing and rewriting standards and tests but these rarely have any effect on the core curriculum that is published School districts and states don t use effectiveness as a criterion for evaluating and purchasing textbooks Publishers don t offer textbooks with better content or the latest teaching methods because teachers don t want textbooks that require them to change their practices Teachers report that they don t rely on a textbook in their class but research shows that they do Three companies publish 75 percent of the K 12 educational materials Those three companies are producing similar programs with the same instructional strategies none of which require teachers to change their practices significantly Publishers write textbooks for California and Texas All of the other markets have to make do with books only superficially adjusted for their states

*From Teach For America to Teach For China* Sara Lam, 2019-11-13

This book examines the role of Teach For China in addressing educational equity and expanding public participation in education The author uses the case of Teach For China to explore the broader theme of the mobility of education models between contexts characterized by neoliberalism and those characterized by strong state control Transnational advocacy networks are increasingly influential in the education policy making process These networks comprised of entrepreneurs and education corporations think tanks philanthropists and government agencies facilitate the global mobility of policy models It

is widely accepted that an education model should not be transplanted from one context to another without careful consideration of how contextual differences might impact the model's effectiveness. The book explores the argument that the same model is not only quantitatively different in terms of effectiveness but that models can play qualitatively different roles in neoliberal and strong state contexts, sometimes moving education reform in opposite directions. The book will appeal to anyone interested in global teacher education reform and equity in education. **Lesson Plans for Friends and Fun**, 1957

*Teaching Reading and Writing Beyond High-stakes Testing* Rongrong Dong, 2023-03-10. This book tells about an exemplary high school Chinese language arts teacher's effort in nurturing lifelong readers and writers under the test-driven culture in China's society. It looks closely at his everyday literacy practices, focuses on his ways of creating authentic reading and writing spaces for students beyond test preparation. With the lens of social constructivism, the case study reveals his efforts of creating a safe learning environment, modeling his literate life, connecting real life with literacy learning, and building a school-wide literate life for students. Furthermore, he also collaborates with other Chinese language arts faculty and reaches out to school administrators and educators to gain any potential teaching resource for students. The findings indicate exemplary teachers are not only equipped with professional knowledge but also inter/intrapersonal knowledge and practical knowledge in their teaching career, which might be enlightening in today's high-stakes testing culture. The book will appeal to scholars of literacy education and teacher education as well as pre-service and in-service teachers.
