Reading Group Choices Reading Group Choices, 2008 **Talk About Books** David Peplow, 2016-02-25 Over the last two decades reading groups have become increasingly popular in the UK and the USA More and more people seem to be interested in sharing their reading experiences and hearing other readers discuss their views on books whether this is online through the mass media or in face to face contexts In light of this explosion in popularity of reading groups this ethnographic study focuses on several reading groups based across a variety of settings public libraries public houses and in readers homes A range of methods are used to investigate the practices of the individual readers and

the groups including participant observation interviews and audio recordings of meetings Reading groups are found to be highly ritualized and potentially competitive places in which matters of identity and taste are often at stake The groups studied are conceptualized as communities of practice and the literary interpretations and evaluations offered within each group are shown to be a product of shared norms established by this group

Reading Groups, Libraries and Social Inclusion Eileen Hyder, 2016-04-01 Reading groups have grown rapidly in popularity and continue to be a significant cultural phenomenon Reading groups in public libraries linked to the learning and social inclusion agenda have expanded to include a wide range of groups within society including people with visual impairments VIPs This under researched area is the focus of this book Library based VIP reading groups are interesting on many levels Given that these groups predominantly use audio versions of the text rather than print this links to debates about the changing nature of reading in a multi modal age This book discusses whether contemporary society still defines reading as a visual activity or whether technological developments have led to a broadening of the definition of reading The author goes on to discuss how policy is translated into practice within the library context and whether the wide range of reading groups linked to libraries suggests that libraries understand and are taking the social inclusion agenda seriously She also explores how effectively libraries are using reading groups as a tool for delivering on the agenda for learning and how this sits within wider priorities for post compulsory education and lifelong learning Finally the book suggests ideas for future development for these groups outlining ways in which their potential could be maximised for the benefit of both the library and the reading group members The book will be of great interest to professional librarians as well as students and scholars of librarianship It will also be of interest to those working on the emerging field of reading groups in literary studies Those interested in the role of reading in education as well as disability scholars will also find the book useful
