Leadership Landscapes provides an invaluable reference point for senior executives or those striving towards a successful cross border career to understand how cultural differences impact upon leadership styles and practices. Each semester we publish a report on our quantitative survey based global study alongside our review of extant in country leadership literature preferably written by local scholars and professionals in their native language. Moreover we attempt to empirically validate these findings by conducting expert interviews with native specialists. This new issue of our ongoing leadership series presents country specific analyses of culturally endorsed leadership practices and styles in the following countries or territories: Channel Islands, Cuba, Ecuador, Egypt, Eritrea, Indonesia, Iran, Ireland, Nepal, Slovakia, Solomon Islands, Ukraine, Uruguay, and Venezuela. This publication contains contributions from around 111 researchers from 26 countries who participated in the Cross Cultural Business Skills elective offered by the Part time Academy of the Faculty of Business and Economics at the Amsterdam University of Applied Sciences HvA. The Material of World History Tina Mai Chen, David S. Churchill, 2015-03-27 This volume considers the confluence of World History and historical materialism with the following guiding question in mind given developments in the field of historical materialism concerned with the intersection of race gender labour and class why is it that within the field of World History historical materialism has been marginalized precisely as World History orients toward transnational socio cultural phenomenon micro studies or global histories of networks Answering this question requires thinking in an inter related manner about both the development of World History as a discipline and the place of economic determinism in historical materialism This book takes the position that historical materialism as applied to the field of World History needs to be more open to the methodological diversity of the materialist tradition and to refuse narrowly deterministic frameworks that have led to marginalization of materialist cultural analysis in studies of global capitalism At the same time World History needs to be more self critical of the methodological diversity it has welcomed through a largely inclusionary framework that allows the material to be considered separately from cultural social and intellectual dimensions of global processes

Schools and Informal Learning in a Knowledge-Based World Javier Calvo de Mora, Kerry J. Kennedy, 2019-09-19 This book has two purposes To open up the debate on the role of informal education in schooling systems and to suggest the kind of school organizational environment that can best facilitate the recognition of informal learning Successive chapters explore what is often seen as a duality between informal and formal learning This duality is particularly so because education systems expend so much time and effort in certifying formal knowledge often expressed in school subjects reflecting academic disciplines Recognizing the contribution informal learning can make to young people s understanding and development does not negate the importance of valued social knowledge That complements it Students come to school with knowledge learnt from their families peers the community and both traditional and social media They should not have to unlearn this in order to enter the world of formal learning Rather students different learning worlds should be integrated so that each informs the other In a knowledge based society all learning needs to be valued Some contributors to this book reflect on how new educational systems could be created in a move away from top down authoritarian and bureaucratic management Such open systems are seen to be more welcoming in acknowledging the importance of informal learning Others provide practical examples of how informal learning is currently recognized Some attention is also paid to the evaluation of informal learning A key objective of the work presented here is to stimulate debate about the role of informal learning in knowledge based societies and to stimulate thinking about the kind of reforms needed to create more open and more democratic school learning environments
