Abstract—The purpose of this study was to determine if there were differences in the prevalence of musculoskeletal disorders between two groups of nurses working in different units of a tertiary care hospital. The prevalence of musculoskeletal disorders was determined by means of a self-administered questionnaire among 100 nurses from each unit. The prevalence of musculoskeletal disorders was higher among nurses working in the intensive care unit than among those working in the medical-surgical unit. The prevalence of musculoskeletal disorders was higher among nurses working in the intensive care unit than among those working in the medical-surgical unit.
