## I. INTRODUCTION

Since past decade, the daily work of finance and insurance is done on the basis of manual system in which the daily updates are written on a diary or paper, which can be maintained in the large files or registers. This existing manual system functions in the following manner:

- A person writes daily work related to insurance and

This paper represents android application for personal finance management. The main purpose of developing this android application is to automate all manual activities and to eliminate all the drawbacks that operations of existing system faces. Since existing system was too much time consuming and it puts the heavy work load of updating and maintaining the record manually. It was necessary to develop such an application which can reduce this work burden and save time in rapidly growing world.

For developing this application we have used android for coding and database to store the data.

## II. LITERATURE REVIEW

Smart Phones has changed the life of everyone. Along with other features, an App in Smart Phones allows to do almost everything, from playing games to do business. The development of app described in present paper has given a strong understanding of various challenges associated with design and development of apps. The experience has been quite challenging, motivating as well as satisfying [1].

Android as a full, open and free mobile device platform, with its powerful function and good user experience rapidly developed into the most popular mobile operating system [3].

It appears that advice is an important part of the landscape for consumers. If broadening access to advice is a policy goal, more efforts might be needed to increase the availability of low-cost, objective, high-quality advice for households with low educational attainment and low incomes. There is a high correlation between advice seeking and financial literacy. As such, the demand for financial advice may increase if financial literacy levels increase across the population [7].
