Working with indigenous knowledge Fhumulani M. Mulaudzi,Rachel T. Lebesse,2022 The aim of the book is to assist both local and international scholars in articulating the scholarly discourse on indigenous health attitudes practices and experiences The indigenous lens that was used to generate and disseminate indigenous knowledge in this book will strengthen indigenous scholarship thus making it accessible to a wider audience In addition the information shared in this book will add value for scholars and assist them with the indigenous knowledge needed to address sustainable development goals This book is timeous and topical as the discourse on the decolonisation of the curriculum is widely debated in the higher education space The discourse on the scholarship of indigenous knowledge as the tacit local knowledge that stems from cultural practices within communities has not been well articulated in the current health science education milieu Indigenous knowledge has remained overlooked and undermined for a very long time and the information remains untapped

in local communities The scholars who conducted the research on which this book is based unearthed a wealth of knowledge which was tacit in nature and translated it into implicit knowledge that can be documented and shared with other scholars globally This knowledge will assist health care scholars in benefiting from knowledge practices and cultural beliefs that will assist them in health care planning teaching evidence based practice and further research *Publishing from the South* Sarah Nuttall, Isabel Hofmeyr, 2024-11 In 2022 Wits University Press marked its centenary making it the oldest most established university press in sub Saharan Africa While in part modelled on scholarly publishers from the global North it has had to contend with the constraints of working under global South conditions marginalisation within the university budgetary limitations small local markets unequal access to international sales channels and the privileging of English language publishing over indigenous languages This volume explores what the Press has achieved and what its modes of reinvention might look like In widening and deepening our understanding of the Press as an example of a global South scholarly publisher this volume asks how publishing can contribute to a broader understanding of Southern knowledge production Featuring contributions from scholars publishers and authors this multi voiced volume showcases the history of the Press s publishing activities over 100 years from documenting its evolution through book covers and giving credence to some of the leading black intellectuals and writers of the early 20th century and the success of those works in spite of their authors racial marginalisation to the role of women both in publishing and in the spaces afforded to women s writing on the Press s list The collection concludes with essays by contemporary authors who detail not only their experiences of working with Southern publishers but also the politics and influences governing their decisions to choose the Press over a Northern publisher Publishing from the South shows the strategies deployed by the Press to professionalise Southern knowledge making and in the process demonstrating how university presses in the global South support the scholarly missions of their universities for both local and global audiences **The Guide to COIL Virtual Exchange** Jon Rubin, Sarah Guth, 2023-07-03 This is the authoritative guide to implementing COIL Virtual Exchange conceived and co edited by one of the originators of this innovative approach to internationalization Jon Rubin COIL the acronym for Collaborative Online International Learning is a central modality of what has come to be known as virtual exchange Since its first iteration in 2002 it has gradually established itself as a mature pedagogy that is being increasingly implemented across the world and is validated by a growing body of research COIL Virtual Exchange at its most essential is a bi lateral online exchange involving the integration of existing courses across two or sometimes more institutions that are geographically and or culturally distinct To launch a COIL VE course the instructor of a class at a higher education institution in one location links online with a professor and his or her class in another region or country Together their students engage and develop joint projects usually over a continuous five to eight week period Compared to the limited number of students worldwide who can engage in study abroad COIL VE potentially opens up more equitable and inclusive participation in international education and intercultural experiences to all

students involves them in rigorous disciplinary and interdisciplinary studies and promotes close and constructive engagement with students with different cultural perspectives While many COIL courses are launched by individual instructors based on their research connections and online outreach they are being increasingly supported and led by dedicated COIL Coordinators who facilitate virtual exchanges and provide professional development This comprehensive guide covers COIL VE pedagogy provides examples of what takes place in the COIL classroom and explores what instructors and staff need to know to facilitate and support a variety of COIL courses across the curriculum It addresses how institutional stakeholders especially those in leadership positions can develop and embed a successful COIL initiative at their institution It offers varied perspectives of COIL viewed from different institutional and cultural vantage points from research universities community and technical colleges and university systems and describes how COIL VE is developing in five different world regions presenting eleven case studies The book concludes with a guide to thirteen global organizations that support COIL and other forms of VE Additionally the book provides links to the COIL Connect for Virtual Exchange website <https://coilconnect.org> which includes an updated directory of organizations an expanding database of faculty and institutions participating in COIL and looking for partners course templates survey data and case studies This book offers faculty and administrators across the world whether formally involved in international education in service learning and community engagement or wanting to incorporate a cross cultural perspective in their disciplinary courses theoretical foundations guidance on effective collaboration and the strategic and pedagogical considerations to develop robust COIL VE courses and programs
