Physical Sciences National Learning Corporation, 2020-03-15 *The National Children's Study Research Plan* National Research Council, Institute of Medicine, Board on Population Health and Public Health Practice, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on National Statistics, Panel to Review the National Children's Study Research Plan, 2008-07-16 The National Children's Study NCS is planned to be the largest long term study of environmental and genetic effects on children's health ever conducted in the United States. It proposes to examine the effects of environmental influences on the health and development of approximately 100 000 children across the United States following them from before birth until age 21. By archiving all of the data collected the NCS is intended to provide a valuable resource for analyses conducted many years into the future. This book evaluates the research plan for the NCS by assessing the scientific rigor of the study and the extent to which it is being carried out with methods, measures and collection of data and specimens to maximize the scientific yield of the study. The book concludes that if the NCS is conducted as proposed the database derived from the study should be valuable for investigating hypotheses described in the research plan as well as additional hypotheses that will evolve. Nevertheless there are important weaknesses and shortcomings in the research plan that diminish the study's expected value below what it might be. **Sky Guide Africa South - 2019**

Astronomical Handbook for South Africa, 2018-11-01 *Sky Guide Africa South 2019* is a practical resource for all astronomers whether they be novice amateur or professional. It covers the upcoming year's planetary movements, predicted eclipses, meteor showers, any events and facets of the night sky that change annually. Star charts plot the evening sky for each season, facilitating the identification of stars and constellations. The guide contains a wealth of information about the Sun, Moon, planets, comets, meteors and bright stars with photos, diagrams, charts and images. There's also an excellent list of useful websites and a comprehensive glossary. This annual publication is an invaluable guide for anyone who has even a passing interest in the night skies of southern Africa and is an absolute must for first time star gazers and professional astronomers alike. Sales points: Contains the latest most up to date information packed with charts, illustrations, images, tables etc for quick reference. Will appeal to a wide audience from beginners to professionals. Includes tips on basic night sky gazing.
