✓ Exclusively available on IvyPanda

Introduction

Physical therapists are medical experts who handle cases dealing with impairments, disability, immobility, or any other critical change of physical function of the body and healthiness as a result of injury.

Their job include but is not restricted to diagnosis procedures, assessments, evaluations and conducting intervention duties so as to attain the highest functional results for every patient. In their daily work, physical therapists are charged with the responsibility of assisting patients suffering from a multitude of illnesses, and victims of accidents as well.

In 2008, it is estimated that the physical therapist were holding about 185,500 positions in the employment register of the US. Some of the physical therapist worked two or more jobs and that made the job statistic greater than they actually are. Most of the therapies do their job in hospital settings, Offices and other health facilities. The physical therapist assist in relieving pain to patients, enhance mobility of their body, reducing physical disability and re-establishing use (Coppola para. 4).

Through the assistance of a patient's medical history, a medical therapist is in a position to examine the patient's strength, posture, coordination, breathing capability, and motor and body balancing function. Plans are the executed in treating patients that have exhibited specific medical conditions.
