Clues

Vocabulary Terms

A type of bond that holds cations and anions together

A type of bond in which two atoms share a pair of valence electrons

A neutral group of atoms that are joined together by one or more covalent bonds

A term describing a covalent bond in which electrons are not shared equally

An ion that contains a covalently bonded group of atoms

An ion with a negative charge

An ion with a positive charge

A notation that shows what elements a compound contains and the ratio of the atoms or ions of these elements in the compound

Solids whose particles are arranged in a lattice structure

A mixture of two or more elements, at least one of which is a metal

A type of bond that exists between a metal cation and the shared electrons that surround it

The force that holds atoms or ions together
