Cushing, M. Saleem, H. M. Srivastava, Mumtaz Ahmad Khan, M. Merajuddin, 2016-12-01 The book contains recent developments and contemporary research in mathematical analysis and in its application to problems arising from the biological and physical sciences The book is of interest to readers who wish to learn of new research in such topics as linear and nonlinear analysis mathematical biology and ecology dynamical systems graph theory variational analysis and inequalities functional analysis differential and difference equations partial differential equations approximation theory and chaos All papers were prepared by participants at the International Conference on Recent Advances in Mathematical Biology Analysis and Applications ICMBAA 2015 held during 4-6 June 2015 in Aligarh India A focal theme of the conference was the application of mathematics to the biological sciences and on current

research in areas of theoretical mathematical analysis that can be used as sophisticated tools for the study of scientific problems The conference provided researchers academicians and engineers with a platform that encouraged them to exchange their innovative ideas in mathematical analysis and its applications as well as to form interdisciplinary collaborations The content of the book is divided into three parts Part I contains contributions from participants whose topics are related to nonlinear dynamics and its applications in biological sciences Part II has contributions which concern topics on nonlinear analysis and its applications to a variety of problems in science engineering and industry Part III consists of contributions dealing with some problems in applied analysis *Liquid Rocket Engine* Rene Nardi Rezende,2018-11-15 The great engineering achievement required to overcome most of the challenges and obstacles that prevented turning rocket design from art into science took place in Europe and the United States between the 1930s and the 1950s With the vast majority of the engines currently in operation developed in the pre computer age there are new opportunities to update the design methodologies using technology that can now handle highly complex calculations fast The space sector with an intense focus on efficiency is driving the need for updating adapting or replacing the old modeling practices with new tools capable of reducing the volume of resources and the time required to complete simulations and analysis This book presents an innovative parametric model applicable to the project of some elements of the liquid rocket thrust chamber with the level of detail and accuracy appropriate to the preliminary design phase It addresses the operating characteristics and dimensioning of some thrust chamber elements through a set of equations and parameters which include thrust or propellant characteristics The model degree of sophistication was adjusted to the requirements of the Project Life Cycle Phase B while also enabling quick analysis of new configurations from changes in initial project parameters *Moscow University Physics Bulletin* Московский государственный университет им. Soviet Physics, JETP. ,1964 On Coexistence Patterns Sindre W. Haugland, 2023-02-20 This book is about coexistence patterns in ensembles of globally coupled nonlinear oscillators Coexistence patterns in this respect are states of a dynamical system in which the dynamics in some parts of the system differ significantly from those in other parts even though there is no underlying structural difference between the different parts In other words these asymmetric patterns emerge in a self organized manner As our main model we use ensembles of various numbers of Stuart Landau oscillators all with the same natural frequency and all coupled equally strongly to each other Employing computer

simulations bifurcation analysis and symmetry considerations we uncover the mechanism behind a wide range of complex patterns found in these ensembles Our starting point is the creation of so called chimeras which are subsequently treated within a new and broader context of related states Soviet Physics, Solid State ,1990 **Ninth Joint International Symposium on Atmospheric and Ocean Optics/Atmospheric Physics** Gennadiï Grigor'evich Matvienko,Vladimir Petrovich Lukin,2003 Physics Express ,1966
