Daily Graphic Ransford Tetteh, 2014-09-19 **Current Progress in Biochemical, Biomedical, and Physical Sciences** Saurabh Basu, A. S. Achalkumar, Subrata Pramanik, Lalit M. Pandey, 2025-10-22 This book presents the proceedings of the 9th edition of Research and Industrial Conclave RIC 2024 held at the Indian Institute of Technology IIT Guwahati from 9 to 11 August 2024. It features a diverse collection of peer-reviewed research articles highlighting emerging trends and application-oriented studies across a broad spectrum of science and technology domains. Broadly, this book features research in Chemistry, Physics, Biosciences, and Bioengineering and Biomedical and Health Sciences, capturing the diversity and depth of interdisciplinary exploration. It captures the essence of modern interdisciplinary research and aims to inspire further investigation and collaboration among researchers, academicians, and industry professionals. The contributions in this book are of particular interest to scholars, early career researchers, and professionals in the fields of applied sciences, engineering, biomedical innovation, materials research, and computational healthcare technologies.

The book covers a wide variety of topics: Global Environmental Change and Ecosystems Management, Graphic and I.

Introductory Nanoelectronics Vinod Kumar Khanna, 2020-07-20 This introductory text develops the reader's fundamental understanding of core principles and experimental aspects underlying the operation of nanoelectronic devices. The author makes a thorough and systematic presentation of electron transport in quantum-confined systems such as quantum dots, quantum wires, and quantum wells, together with Landauer-Büttiker formalism and non-equilibrium Green's function approach. The coverage encompasses nanofabrication techniques and characterization tools, followed by a comprehensive exposition of nanoelectronic devices, including resonant tunneling diodes, nanoscale MOSFETs, carbon nanotube FETs, high electron mobility transistors, single electron transistors, and heterostructure optoelectronic devices. The writing throughout is simple and straightforward, with clearly drawn illustrations and extensive self-study exercises for each chapter. Introduces the basic concepts underlying the operation of nanoelectronic devices. Offers a broad overview of the field, including state-of-the-art developments. Covers the relevant quantum and solid-state physics and nanoelectronic device principles. Written in lucid language with accessible mathematical treatment. Includes extensive end-of-chapter exercises and many insightful diagrams.

ICTES 2018 Robbi Rahim, Kadek Suranata, Ifdil Ifdil, Itsar Bolo Rangka, 2019-03-13 The technical program of The First ICTES 2018 consisted of 114 full papers. Aside from the high-quality technical paper presentations, we also held a workshop and a clinic manuscript that was carried out before the main track. Aims to strengthen the ability to write scientific publications. Coordination with the steering chairs, Dr. Kadek Suranata, S. Pd. M. Pd. Kons, and the members of the organizing committee is essential for the success of the conference. We sincerely appreciate all the

Advisory Boards for the constant support and guidance It was also a great pleasure to work with such an excellent organizing committee team for their hard work in organizing and supporting the conference In particular the Scientific Committee led by Cand Dr Robbi Rahim M Kom have completed the peer review process of technical papers and made a high quality technical program We are also grateful to Students Conference chairs were leading by Ida Ayu Made Diah Paramiswari for their support and all the authors who submitted their papers to the First ICTES 2018 We strongly believe that ICTES conference provides a good forum for all academicians researchers and practitioners to discuss all Educational science and technology aspects that are relevant to issues and challenge for sustainability in the 4th industrial revolution We also expect that the future ICTES conference will be as successful and stimulating as indicated by the contributions presented in this volume

Hursh, 2015-10-16 *The End of Public Schools* analyzes the effect of foundations corporations and non governmental organizations on the rise of neoliberal principles in public education By first contextualizing the privatization of education within the context of a larger educational crisis and with particular emphasis on the Gates Foundation and influential state and national politicians it describes how specific policies that limit public control are advanced across all levels Informed by a thorough understanding of issues such as standardized testing teacher tenure and charter schools David Hursh provides a political and pedagogical critique of the current school reform movement as well details about the increasing resistance efforts on the part of parents teachers and the general public How We Teach Science John L. Rudolph, 2019-06-01 Despite an enduring belief that science should be taught there has been no enduring consensus about how or why This is especially true when it comes to teaching scientific process John Rudolph shows that how we think about and teach science will either sustain or thwart future innovation and determine how science is perceived by the public

Superconductivity: Discoveries and Discoverers Kristian Fossheim, 2014-07-08 This book is about the work of 10 great scientists who they were and are their personal background and how they achieved their outstanding results and took their prominent place in science history We follow one of physics and science history s most enigmatic phenomena superconductivity through 100 years from its discovery in 1911 to the present not as a history book in the usual sense but through close ups of the leading characters and their role in that story the Nobel laureates who were still among us in the years 2001 2004 when the main round of interviews was carried out Since then two of them already passed away For each one of the 10 laureates the author tells their story by direct quotation from interviews in their own words Each chapter treats one laureate The author first gives a brief account of the laureates scientific background and main contribution Then each laureate tells his own story in his own words This book is unique in its approach to science history **Measurements in**
