Physical Setting Earth Science Answer Key 2014:

A Decision Framework for Managing the Spirit Lake and Toutle River System at Mount St. Helens National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Environmental Change and Society, Division on Earth and Life Studies, Water Science and Technology Board, Board on Earth Sciences and Resources, Committee on Geological and Geotechnical Engineering, Committee on Long-Term Management of the Spirit Lake/Toutle River System in Southwest Washington, 2018-04-29 The 1980 eruption of Mount St Helens in southwest Washington State radically changed the physical and socio economic landscapes of the region The eruption destroyed the summit of the volcano sending large amounts of debris into the North Fork Toutle River and blocking the sole means of drainage from Spirit Lake 4 miles north of Mount St Helens As a result of the blockage rising lake levels could cause failure of the debris blockage putting the downstream population of approximately 50 000 at risk of catastrophic flooding and mud flows Further continued transport of sediment to the river from volcanic debris deposits surrounding the mountain reduces the flood carrying capacity of downstream river channels and leaves the population vulnerable to chronic flooding The legacy of the 1980 eruption and the prospect of future volcanic seismic and flood events mean that risk management in the Spirit Lake Toutle River system will be challenging for decades to come This report offers a decision framework to support the long term management of risks related to the Spirit Lake and Toutle River system in light of the different regional economic cultural and social priorities and the respective roles of federal tribal state and local authorities as well as other entities and groups in the region It also considers the history and adequacy of characterization monitoring and management associated with the Spirit Lake debris blockage and outflow tunnel other efforts to control transport of water and sediment from the 1980 and later eruptions and suggests additional information needed to support implementation of the recommended decision framework

Motivating the SEL Field Forward Through Equity Nicholas Yoder,Alexandra Skoog-Hoffman,2021-11-25 Motivating the SEL Field Forward Through Equity looks for a deeper critical understanding of the role of social and emotional learning SEL as a lever for equitable access to the competencies and skills individuals will ultimately need to be successful in school work and life **Carbon dioxide removal: Perspectives from the social sciences and humanities** Anders

Hansson,Mathias Fridahl,Miranda Boettcher,Shinichiro Asayama,2024-07-09 Carbon dioxide removal CDR approaches are

becoming increasingly central to visions of decarbonizing national economies The past few years have seen an increasing number of countries committed to net zero targets preceded by a surge of modelled 1.5°C scenarios envisioning large scale future CDR deployment The prospect of CDR deployment raises new complex socio ecological challenges and presents new deep uncertainties These complexities challenges and uncertainties cannot be investigated using solely the techno economic modelling and environmental risk assessment methods that currently dominate the construction of policy relevant knowledge on CDR Social sciences and the humanities perspectives on CDR are often restricted to instrumental tasks such as investigating public acceptance overcoming social resistance or supporting the development of integrated assessment models There is a need for more diverse investigations of CDR which include not only environmental and techno economic dimensions but also explore key societal complexities challenges and uncertainties Against this backdrop we call for submissions on CDR stemming from perspectives within the social sciences and humanities We encourage novel empirical and theoretical contributions on CDR related policy design or analyses of recent policy developments at sub national national and international levels of governance e.g. in context of climate targets and strategies climate tipping points mitigation deterrence or societal transformations
