Exercises for advanced Spanish-speaking learners of English. Book 2. Kennedy-Scanlon, Michael, Cebrian, Juli, Bradbury, John, 2024-10-09 This book is the result of years of experience teaching English to Spanish undergraduates studying for a degree in English Language and Literature The focus of the book reflects the assumption that a large majority of the mistakes made by advanced level learners are the result of interference from their native language The approach adopted in this book is based on the idea that correcting one's own mistakes involves two separate operations namely first recognising the error as such and then providing the correction for it In the first two thirds of the book errors are explicitly identified for the learner whose task is simply to correct the errors In the final third however learners must carry out both operations It is this two step approach that the term guided error correction tries to reflect In order to provide sufficient practice each of the errors all characteristic of Spanish speakers learning English occurs on six separate occasions in the book In addition the book includes a section of brief explanatory notes at the back of the book where each of the errors is explained with Spanish translations provided to enhance comprehension of nuances in meaning These notes are cross referenced with each error in the exercises for handy referral but at the same time represent in themselves a compact reference source for common errors This book will be useful for advanced level Spanish speaking learners of English in any context though it has been designed primarily not for systematic consecutive classroom use but rather as a series of self correcting one page exercises that can be pursued sporadically at the learner's convenience This book is part of a series of three books **Fundamentals of Physics, Part 1 (Chapters 1-11)** David Halliday, Robert Resnick, Jearl Walker, 2003-12-19 Finally an interactive website based on activities you do every day The new Halliday Resnick Walker 7e eGrade Plus program provides the value added support that instructors and students want and need Powered by Wiley's EduGen system this site includes a vast array of high quality content including Homework Management An Assignment tool allows instructors to create student homework and quizzes using dynamic versions of end of chapter problems from Fundamentals of Physics or their own dynamic questions Instructors may also assign readings activities and other work for students to complete A Gradebook automatically grades and records student assignments This not only saves time but also provides students with immediate feedback on their work Each student can view his or her results from past assignments at any time An Administration tool allows instructors to manage their class rosters on line A Prepare and Present tool contains a variety of the Wiley provided resources including all the book illustrations Java applets and digitized video to help make preparation time more efficient This content may easily be adapted customized and supplemented by instructors to meet the needs of each course Self Assessment A Study and Practice area links directly to the multimedia
