Bagehot Walter Bagehot, 2010-02-19. A passage from the book. I do not supply it. If we wanted to describe one of the most marked results, perhaps the most marked result of late thought, we should say that by it everything is made an antiquity. When in former times our ancestors thought of an antiquarian, they described him as occupied with coins and medals and Druids' stones; these were then the characteristic records of the decipherable past, and it was with these that decipherers busied themselves. But now there are other relics; indeed, all matter is become such. Science tries to find in each bit of earth the record of the causes which made it precisely what it is; those forces have left their trace, she knows as much as the tact and hand of the artist left their mark on a classical gem. It would be tedious, and it is not in my way, to reckon up the ingenious

questionings by which geology has made part of the earth at least tell part of its tale and the answers would have been meaningless if physiology and conchology and a hundred similar sciences had not brought their aid Such subsidiary sciences are to the decipherer of the present day what old languages were to the antiquary of other days they construe for him the words which he discovers they give a richness and a truth like complexity to the picture which he paints even in cases where the particular detail they tell is not much

and 'Inheritance' to Political Society Walter Bagehot, 2006-02 Originally published in 1891 Author Walter Bagehot Language English Keywords Social Sciences Many of the earliest books particularly those dating back to the 1900s and before are now extremely scarce and increasingly expensive Obscure Press are republishing these classic works in affordable high quality modern editions using the original text and artwork Panofsky on Physics, Politics, and Peace Wolfgang K.H. Panofsky, 2007-08-06 This volume contains an unsystematic account of my past work it is not intended to be an autobiography in the conventional meaning of the term It is not even remotely a scholarly description of the momentous developments in which I was able to participate rather it is a recital of memorable episodes borrowing from the compulsory preface of a facetious British history History is not what you thought It is what you can remember Thus this volume suffers from many sins of omission including full attribution of deserved credits but it is hoped only few sins of commission The author is greatly indebted to his colleagues and his wife Adele who kindly reviewed many segments of the manuscript describing shared experiences They are Sidney Drell Greg Loew Ed Lofgren Harvey Lynch Richard B Neal Richard Panofsky and Burt Richter But the author nevertheless is responsible for any errors Because of the multitude of topics into which I was drawn concurrently a strictly chronological account would prove unreadable Accordingly the book is divided into chapters each of which covers a limited period of engagement in a coherent subject matter an approach clearly again unsystematic but hopefully more conducive to conveying the substance of the work This account does not include a description of my family life
