(turn this in to your TA as you enter the classroom)

I. Reading Preparation

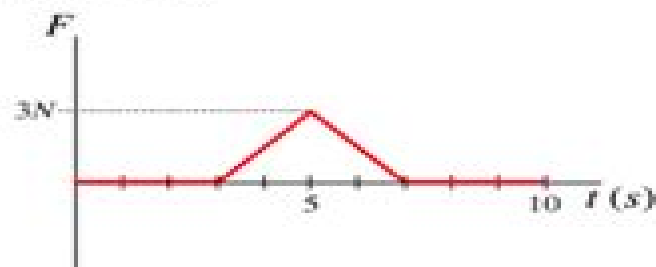

By checking the boxes below, I certify that I have read the following in preparation of this lab:

☐ *Physics 9A Lab Manual, Lab #06: Momentum & Varying Force*

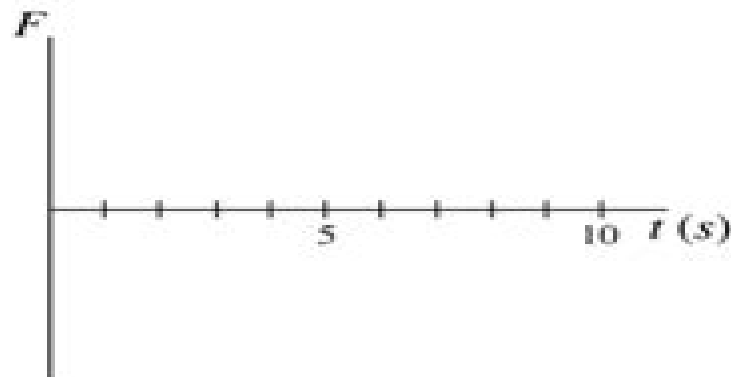

☐ *Physics 9A LibreText, Section 4.1*

II. Time-Varying Force

Two objects collide with each other along a straight line (i.e. in one dimension), the repulsive force on object A by object B is measured as a function of time, and it is recorded in the graph shown.

1. Using the same time scale and spatial coordinate system as in the graph above, sketch a graph of the force exerted on object B by object A. Explain how you came up with this graph.

2. Compute the impulse delivered to object A by object B.

3. How are the features of the graphs of *acceleration* of the two objects related? Is it the same as the force graphs, or does something possibly make the relationships different?
