

Intermolecular Forces

Context: Properties of molecules are determined by both the force of the chemical bonds that hold molecules together and the forces that occur between separate molecules.

The forces between molecules are called **intermolecular forces** and are largely caused by the how the electrons in molecules are oriented relative to other molecules.

Because we cannot easily measure the exact strength of intermolecular forces, we will typically use boiling point and vapor pressure as stand-ins for the amount of intermolecular forces in a molecule.

Model 1: Table of Interactions Between Magnets and Metal

	Interaction	Factors
Magnet-Magnet		
Magnet-Metal		
Metal-Metal		

Questions:

1) For each arrangement of magnets and metal bring them together until they touch. Describe how the pair interact with each other as they approach each other and when they touch. Record these interactions on the table above.

2) In the magnet-magnet interaction, how did the poles of the magnet arrange themselves as the magnets approached each other?
