The Latecomer's Rise Muyang Chen,2024-06-15 In *The Latecomer's Rise* Muyang Chen reveals the nature and impact of a rapidly growing form of international lending: Chinese development finance. Over the past few decades China has become the world's largest provider of bilateral development finance. Through its two national policy banks, the China Development Bank (CDB) and the Export-Import Bank of China (China Exim), it has funded infrastructure and industrial projects in numerous emerging markets and developing countries. Yet this very surge and magnitude of capital has raised questions about the characteristics of Chinese bilateral lending and its repercussions on the international order. Drawing on a variety of novel Chinese primary sources including interviews and official bank documents, Chen pinpoints the distinctiveness of Chinese bilateral development finance, explains its origins and analyzes its effects. She compares Chinese policy banks with their foreign counterparts to show that the CDB and China Exim, while state supported, are in fact also market oriented; they are as much government organs as they are profit-driven financial agencies that serve both state and firms' interests. This approach, which emerged out of China's particular economic history, suggests that Chinese overseas lending is not merely a tool of economic statecraft that challenges Western-led economic regimes. Instead, China's responses to extant rules, norms and practices across given issue areas have varied between contestation and convergence. Rich with empirical detail and penetrating insights, *The Latecomer's Rise* demystifies the little-known workings of Chinese development finance to revise our conceptions of China's role in the international financial system.

China's Unfinished Economic Revolution

Nicholas R. Lardy, 1998-07-01 China s Unfinished Economic Revolution offers a fundamentally different interpretation of China s economic reform The common view that China s gradualistic approach has served it well overlooks the fact that state owned banks for the last two decades have channeled a large share of sharply rising household savings into what are mostly unreformed money losing companies The result is that several of China s largest financial institutions now are insolvent To avoid a major domestic banking crisis the book argues that China must recapitalize and restructure its domestic banking system and end the long standing practice of making lending decisions based on political rather than economic criteria Nicholas Lardy explains that this course will inevitably be costly in political terms in part because it will lead for a time to a slower rate of economic growth But the alternative is even less attractive permanently slower growth continued macroeconomic instability an inability to meet the expectations of the international community for the opening of its domestic financial markets and insufficient resources to deal with severe environmental deterioration growing water shortages and a rapidly aging population This timely book also analyzes the new reform initiatives China has launched in the wake of the Asian financial crisis suggests additional steps that must be taken and evaluates the implications for U S policy
