

Name _____ Date _____ Per _____

Periodic Trends Lab

Periodic law states that when the elements are arranged in order of increasing atomic number, there is a periodic repetition of their chemical and physical properties. Elements within the same group have the most similar chemical and physical properties, although not identical. Elements in neighboring groups may also have similar chemical and physical properties, but to a lesser degree. Trends in properties occur within groups and across periods.

PURPOSE: In this activity, you will

- Interpret group and periodic trends in atomic radius, electronegativity, and ionization energy
- Graph these trends

PROCEDURE:

1. Complete the pre-lab section
2. Using the data from **Table S** of your reference tables, prepare the graphs listed below. Staple your graphs to the back of this lab packet.

On each graph be sure to:

- **USE PENCIL!**
- Put an appropriate title and labels for each axis.
- Omit the transition elements.
- Connect the points you plot.
- Connect the points representing Group 1 elements with a green line.
- Connect the points representing Group 2 elements with a blue line.
- Connect the points representing Group 17 elements with a red line.
- Draw a triangle around the points representing the elements of Period 3.

GRAPH 1. Atomic radius vs. atomic number for elements 1-54.

GRAPH 2. Electronegativity vs. atomic number for elements 1-54.

GRAPH 3. Ionization energy vs. atomic number for elements 1-54.

3. Complete the conclusion section.

Periodic Trend Lab

The S Files Rebecca Linam,2015-04-25 Warning What you are about to read is a complete and truthful account of the world of espionage Forget everything you thought you knew about spies What you thought you knew is totally wrong For example did you know that the Russian Spy Agency employed seven year old spies the American Spy Agency s top scientist Dr Pepper cloned its most successful agents the Japanese Spy Agency developed a type of cheese that boosted its agents success rates by up to 25% the Spanish Spy Agency invented its famous tickle torture the Flemish Spy Agency uncovered a Martian plot to take over the world the Phlegmish Spy Agency was responsible for many major flu outbreaks during the Cold War You might also think that backwards Russian pig Latin is not a real spy code but it s listed in the Russian Spy Agency handbook This book explains how it really happens This is spying in its true exposed form This book will self destruct when you finish reading it

Exploring Chemistry in Today's World Kathy L. Tyner,1993 The labs were specifically chosen with several goals in mind a To parallel lecture topics b To demonstrate important chemical principles c To employ the use of techniques of self discovery and the scientific method d To illustrate topics that are of public interest or concern e To encourage the application of chemistry outside the laboratory In keeping with these goals the author has included laboratory assignments that are applicable to the real world or contain supplemental exercises that illustrate an application Where possible commercial products are used such as aspirin antacids etc Each lab begins with written objectives Then in an effort to increase involvement before the lab work begins questions are posed that ask the student a To make predictions about the outcome of the experiment b To formulate a hypothesis c To think about a phenomenon in a specific way d To apply personal experience in answering a questions Pref

Chemistry McGraw-Hill Staff,2001-07 *Lab Manual for General, Organic, and Biochemistry* Denise Guinn,Rebecca Brewer,2009-08-21 Teaching all of the necessary concepts within the constraints of a one term chemistry course can be challenging Authors Denise Guinn and Rebecca Brewer have drawn on their 14 years of experience with the one term course to write a textbook that incorporates biochemistry and organic chemistry throughout each chapter emphasizes cases related to allied health and provides students with the practical quantitative skills they will need in their professional lives Essentials of General Organic and Biochemistry captures student interest from day one with a focus on attention getting applications relevant to health care professionals and as much pertinent chemistry as is reasonably possible in a one term course Students value their experience with chemistry getting a true sense of just how relevant it is to their chosen profession To browse a sample chapter view sample ChemCasts and more visit www.whfreeman.com/gob
