Joanna S. Forstrom, 2010-03-31 One of the most influential debates in John Locke s work is the problem of personal identity over time This problem is that of how a person at one time is the same person later in time and so can be held responsible for past actions The time of most concern for Locke is that of the general resurrection promised in the New Testament Given the turbulence of the Reformation and the formation of new approaches to the Bible many philosophers and scientists paid careful attention to emerging orthodoxies or heterodoxies about death Here K Joanna S Forstrom examines the interrelated positions of Rene Descartes Thomas Hobbes

Henry More and Robert Boyle in their individual contexts and in Locke's treatment of them. She argues that in this way we can better understand Locke and his position on personal identity and immortality. Once his unique take is understood and grounded in his own theological convictions or lack thereof, we can better evaluate Locke and defend him against classic objections to his thought.

The Person of the Therapist Training Model Harry J. Aponte, Karni Kissil, 2016-01-08 The Person of the Therapist Training Model presents a model that prepares therapists to make active and purposeful use of who they are personally and professionally in all aspects of the therapeutic process: relationship assessment and intervention. The authors take a process that seems vague and elusive, the self of the therapist, work and provide a step-by-step description of how to conceptualize structure and implement a training program designed to facilitate the creation of effective therapists who are skilled at using their whole selves in their encounters with clients. This book looks to make conscious and planned use of a therapist's race, gender, culture, values, life experience, and in particular, personal vulnerabilities and struggles in how he or she relates and works with clients. This evidence-supported resource is ideal for clinicians, supervisors, and training programs.

The Structure of Ideas Jared Schroeder, 2024-06-18 In his historic 1919 dissent, Justice Oliver Wendell Holmes named and thus catalyzed the creation of the marketplace of ideas. This conceptual space has ever since been used to give shape to American constitutional notions of the freedom of expression. It has also eluded clear definition as jurists and scholars have contested its meaning for more than a century. In *The Structure of Ideas*, Jared Schroeder takes on the task of mapping the various iterations of the marketplace from its early foundations in Enlightenment beliefs in universal truths and rational actors to its increasingly expansive parameters for protecting expression in the arenas of commercial, corporate, and online speech. Schroeder contends that in today's information landscape, marked by the rapid emergence of artificial intelligence, the marketplace is failing to provide a space where truths succeed and falsity fails. AI and networked technologies have thoroughly overpowered all traditional pictures of the marketplace up to now. Schroeder proposes various theoretical interventions that would revise the marketplace for the current moment and concludes by describing a new space built around algorithms, AI, and virtual communication.
