Haining, Guangquan Li, 2020-01-27 Modelling Spatial and Spatial Temporal Data A Bayesian Approach is aimed at statisticians and quantitative social economic and public health students and researchers who work with spatial and spatial temporal data It assumes a grounding in statistical theory up to the standard linear regression model The book compares both hierarchical and spatial econometric modelling providing both a reference and a teaching text with exercises in each chapter The book provides a fully Bayesian

self contained treatment of the underlying statistical theory with chapters dedicated to substantive applications The book includes WinBUGS code and R code and all datasets are available online Part I covers fundamental issues arising when modelling spatial and spatial temporal data Part II focuses on modelling cross sectional spatial data and begins by describing exploratory methods that help guide the modelling process There are then two theoretical chapters on Bayesian models and a chapter of applications Two chapters follow on spatial econometric modelling one describing different models the other substantive applications Part III discusses modelling spatial temporal data first introducing models for time series data Exploratory methods for detecting different types of space time interaction are presented followed by two chapters on the theory of space time separable without space time interaction and inseparable with space time interaction models An applications chapter includes the evaluation of a policy intervention analysing the temporal dynamics of crime hotspots chronic disease surveillance and testing for evidence of spatial spillovers in the spread of an infectious disease A final chapter suggests some future directions and challenges

Enhancing Sustainable Crop Production: Biostimulants and Biotechnological Approaches in Challenging Climates Günter Neumann, Fahim Nawaz, Markus Weinmann, Vicent Arbona, Raffaella Balestrini, Chiara Pagliarani, Miguel Gonzalez-Guzman, 2025-01-07 In the face of climate change agricultural and horticultural systems are encountering challenges related to resource availability agrochemical restrictions and production costs The use of biostimulants as plant strengtheners and green biotechnological strategies offers potential solutions However there are limitations to their field application making it crucial to bridge the gap between lab research and practical implementation Meanwhile the need for safe and environmentally friendly practices to ensure sustainable food production in challenging climates is growing This Research Topic aims to explore the field application of biostimulants and novel biotechnological approaches for enhancing crop productivity and stress tolerance We invite authors to submit research papers on the application of biostimulants in cropping systems under field conditions including arable and permanent crops

Perturbation, Behavioural Feedbacks, and Population Dynamics in Social Animals Daniel Oro, 2020 In social animals perturbations may trigger specific behavioural responses with consequences for dispersal and complex population dynamics Perturbations raise the need for information gathering in order to reduce uncertainty and increase resilience Updated information is then shared within the group and social behaviours emerge as a self organized process This social information factoralizes with the size of the group and it is finally used for making crucial decisions about for instance when to leave the patch and where to go Indeed evolution has favoured philopatry over dispersal and this trade off is challenged by perturbations When perturbations accumulate over time they may decrease the suitability of the patch and erode the philopatric state until crossing a tipping point beyond which most individuals decide to disperse to better areas Initially the decision to disperse is led by a few individuals and this decision is copied by the rest of the group in an autocatalytic way This

feedback process of social copying is termed runaway dispersal Furthermore social copying enhances the evolution of cultural and technological innovation which may cause additional nonlinearities for population dynamics Social information gathering and social copying have also occurred in human evolution especially after perturbations such as climate extremes and warfare In summary social feedback processes cause nonlinear population dynamics including hysteresis and critical transitions from philopatry to patch collapses and invasions which emerge from the collective behaviour of large ensembles of individuals

Physical Science Predatory Exam 2014 Gauteng Introduction

In this digital age, the convenience of accessing information at our fingertips has become a necessity. Whether its research papers, eBooks, or user manuals, PDF files have become the preferred format for sharing and reading documents. However, the cost associated with purchasing PDF files can sometimes be a barrier for many individuals and organizations. Thankfully, there are numerous websites and platforms that allow users to download free PDF files legally. In this article, we will explore some of the best platforms to download free PDFs. One of the most popular platforms to download free PDF files is Project Gutenberg. This online library offers over 60,000 free eBooks that are in the public domain. From classic literature to historical documents, Project Gutenberg provides a wide range of PDF files that can be downloaded and enjoyed on various devices. The website is user-friendly and allows users to search for specific titles or browse through different categories. Another reliable platform for downloading Physical Science Predatory Exam 2014 Gauteng free PDF files is Open Library. With its vast collection of over 1 million eBooks, Open Library has something for every reader. The website offers a seamless experience by providing options to borrow or download PDF files. Users simply need to create a free account to access this treasure trove of knowledge. Open Library also allows users to contribute by uploading and sharing their own PDF files, making it a collaborative platform for book enthusiasts. For those interested in academic resources, there are websites dedicated to providing free PDFs of research papers and scientific articles. One such website is Academia.edu, which allows researchers and scholars to share their work with a global audience.
