Atoms are the _____ particle of matter. Atoms contain _____ protons and negative electrons. These positive and negative charges in matter create electricity. An uncharged object has a _____ of positive and negative charges. A charged object has a _____ of either positive or negative charges. This build up is called _____ electricity. This happens when the negative charges move from one object to the other. The negatively charged object is _____ to a positively charged object or an uncharged object. When the objects come together, the negative charges _____ onto the other object and produce a tiny spark.

Electrically charged objects are attracted to uncharged objects. Circle the uncharged object.

Complete the models below by drawing the correct positive or negative charges on the blank balloons.
