Physical Sciences Pexemplar Grade 2013:

Inclusive Texts in Elementary Classrooms Amy J. Heineke, Aimee Papola-Ellis, 2022 Learn how to put children's diverse and storied experiences at the center of the curriculum. Schools are more diverse than ever before, but the texts and materials that typify classroom curricula continue to prioritize so-called mainstream stories and perspectives. These canonical texts often exclude the nuanced identities and rich lived experiences of the very children sitting in today's classrooms. But kids thrive when they see themselves in texts and learn about the world around them by connecting with the experiences of others. Based on the authors' work with elementary school teachers over the last decade, this resource offers strategies for moving away from canonical texts. The authors present a four-part framework for selecting, using, and engaging students with texts that promote children's identity development, literacy engagement, and comprehension and learning across the content areas. The practical text provides guidance for setting learning goals that align with relevant standards and curricular directives, as well as classroom examples, teaching strategies, and reflective questions. **Book Features:** An actionable way for teachers to move from theory to practice using what we know about culturally relevant practice and critical literacy to create instruction that enhances children's classroom experiences and learning. An inclusive and intersectional approach that supports all teachers in enhancing their classroom libraries and curricular resources for the benefit of all students. Specific ideas for texts and authors, as well as more generalizable themes and ideas that will guide future exploration and use of texts in classrooms. Tangible strategies and rich classroom examples from 20 expert teachers spanning diverse elementary school settings. Reflective questions to help practitioners personalize the content to their own contexts. **Handbook of**

Research-Based Practices for Educating Students with Intellectual Disability Karrie A. Shogren, LaRon A. Scott, Evan E. Dean, Brad Linnenkamp, 2024-09-10 Now in its second edition, this comprehensive handbook emphasizes research-based practices for educating students with intellectual disability across the life course, from early childhood supports through the transition to adulthood. Driven by the collaboration of accomplished nationally recognized professionals of varied approaches, lived experience, and expertise, and philosophies, the book is updated with new theory and research-based practices that have been shown to be effective through multiple methodologies to help readers select interventions and supports based on the evidence of their effectiveness. Considering the field of intellectual disability from a transdisciplinary perspective, it integrates a greater focus on advancing equity in educational outcomes for students. This book is a professional resource and graduate-level text for preservice and in-service educators, psychologists, speech language therapists, and other clinicians involved in the education of children, youth, and adults with intellectual disability. *Curriculum Planning and Instructional Design for Gifted Learners* Joyce VanTassel-Baska, Ariel Baska, 2021-09-23 This updated third edition of *Curriculum Planning and Instructional Design for Gifted Learners* Teaching the Content Areas to English Language Learners in Secondary Schools Luciana C. de Oliveira, Kathryn M.
