Casillas, 2015-04-30 **The Climate Majority** Leo Barasi, 2017-10-10 The Climate Majority is the first book to investigate climate apathy to describe how it prevents action to stop climate change and to show how it can be beaten with an approach developed for political campaigns Leo Barasi argues that dangerous climate change will only be prevented if the majority of people including those who aren't environmentalists are persuaded of the need to limit emissions He applies his policy and campaign experience to show that politicizing climate change makes it more difficult to build consensus particularly among people who are currently apathetic This is one of few books to focus on public opinion and climate change and it attempts to reveal what people really think by drawing examples and evidence of from the United States the UK Australia and Canada In a time of growing

nationalism in many developed countries and right wing negativity towards the need for meaningful action The Climate Majority offers a new way of understanding what can be done within the system rather than despite it In an era of political setbacks for sustainability we need new hope and new tools Anyone who cares about climate change can draw on the lessons in this book to help build a climate majority Leo Barasi is a freelance consultant on climate change policy and campaigns He works with charities political candidates and private companies to help them understand and change public opinion He writes regularly for the New Statesman openDemocracy and Climate Home
