Introduction to Teaching Gene E. Hall, Linda F. Quinn, Donna M. Gollnick, 2018-11-29 An ideal introductory text for aspiring teachers Introduction to Teaching Making a

Difference in Student Learning is grounded in the realities and complexities found in today's schools. Acclaimed authors Gene E. Hall, Linda F. Quinn, and Donna M. Gollnick thoroughly prepare readers to make a difference as teachers presenting firsthand stories and evidence-based practices while offering a student-centered approach to learning. The authors focus on how to address one of the biggest challenges facing many of today's schools: ensuring that all students are learning and help teachers prioritize student learning as their primary focus. From true-to-life challenges that future teachers will face such as high-stakes testing, reduced funding, low retention, and Common Core State Standards to the inspiration and joy they will experience throughout their teaching careers, the Third Edition paints an importantly authentic picture of the real life of a teacher.

The contribution of behavioural science to addressing the social and wider determinants of health

Michael P. KELLY, Ananya ARORA, Anjali BANERJEE, Jack M. BIRCH, Nnenna EKEKE, Isla KUHN, Carol BRAYNE, John FORD, Maria Raisa Jessica AQUINO, Beth CAPPER, 2023-11-09. This report describes the differences and similarities between two approaches to health equity and inequalities. These approaches are individually oriented: behaviour change and the social or wider determinants of health. The report is based on a review of reviews of the behavioural intervention and wider determinants literatures and a narrative review of other relevant materials. The report makes the case for the consilience between the differing approaches. This report is part of a suite of publications and tools designed to support Member States and public health practitioners to use behavioural science in their work.

Theorizing Teaching and Learning in Asia and Europe John Chi-Kin Lee, Kerry J. Kennedy, 2017-03-27. There has been much debate in recent times between the Anglo-American tradition of curriculum studies and the Continental and North European tradition of didactics. Didaktik. As important as such debate has been, this book seeks to add new voices to the debate, representing ideas and traditions from a different part of the world. The focus is on Chinese curriculum thinking that has passed through a number of stages and currently represents a blend of some aspects of the American tradition and Chinese cultural traditions. How does Chinese thinking about curriculum teaching and learning resonate with European didactic traditions and what are the implications for theorizing an expanded field of curriculum studies? This book deliberately transcends borders and cultures to explore new territory to provide a platform for open dialogue and to open up new areas of investigation. Chapters include: Curriculum Reform and Research in China: A Social Historical Perspective; What Mathematics Did Teachers Learn: Comparison of the School and the Pre-Service Teacher; Mathematics Curricula in Germany and Taiwan: Living in Parallel Worlds; A Transatlantic Dialogue between General Didactics and Instructional Design.

Ecology and Management of Black-tailed and Mule Deer of North America James R. Heffelfinger, Paul R. Krausman, 2023-04-27 Choice Outstanding Academic Title 2024 Black-tailed and mule deer represent one of the largest distributions of mammals in North America and are symbols of the wide open American West. Each chapter in this book was authored by the world's leading experts on that topic. Both editors, James R. Heffelfinger and Paul R. Krausman, are widely published in the popular and scientific press and recipients of the O. C. Wallmo Award given every two years to a leading black-tailed and mule deer expert who has made significant contributions to the conservation of this species. In addition, Heffelfinger has chaired the Mule Deer Working Group sponsored by the Western Association of Fish and Wildlife Agencies for more than 15 years. This working group consists of the leading black-tailed and mule deer experts from each of 24 states, provinces and territories in western North America, putting them at the forefront of all conservation and much of the research on this species. The book represents all current knowledge available on these deer, including how changing conditions such as fires, habitat alteration and loss, disease, climate change, socio-economic forces, energy development and other aspects are influencing their distribution and abundance now and into the future. It takes a completely fresh look at all chapter topics. The revisions of distribution, taxonomy, evolution, behavior and new and exciting work being done in deer nutrition, migration and movements, diseases, predation and human dimensions are all assembled in this volume. This book will instantly become the foundation for the latest information and management strategies to be implemented on the ground by practitioners and to inform the public. Although this book is about deer, the topics discussed influence most terrestrial wildlife worldwide and the basic concepts in many of the chapters are applicable to other species.
